For the Period April 11, 2023 ⁽⁷⁾ to March 31, 2024	\$24.99	0.61	2.74	3.35	(0.55)	(0.55)	\$27.79	13.53%	\$6,391	0.94%	2.40%	82%

(1) Net investment income per share represents net investment income divided by the daily average shares of beneficial interest outstanding throughout the period.

(2) All returns reflect reinvested dividends, if any, but do not reflect the impact of taxes. Total return for a period of less than one year is not annualized.

(3) For periods of less than one year, these ratios are annualized.

(4) Net expenses include effects of any reimbursement or recoupment.

(5) Net expenses do not include expenses of the investment companies in which the Fund invests.

(6) Portfolio turnover is not annualized and is calculated without regard to short-term securities having a maturity of less than one year. Excludes the impact of in-kind transactions.

(7) Commencement of operations.

The accompanying notes are an integral part of these financial statements.

NOTES TO THE FINANCIAL STATEMENTS
September 30, 2024 (Unaudited)

NOTE 1 – ORGANIZATION

MKAM ETF (the “Fund”) is a series of the EA Series Trust (the “Trust”), which was organized as a Delaware statutory trust on October 11, 2013. The Trust is registered with the Securities and Exchange Commission (“SEC”) under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end management investment company and the offering of the Fund’s shares (“Shares”) is registered under the Securities Act of 1933, as amended (the “Securities Act”). The Fund will be considered to be non-diversified. The Fund commenced operations on April 11, 2023. The Fund qualifies as an investment company as defined in the Financial Accounting Standards Codification Topic 946-Financial Services - Investment Companies. The Fund’s investment objective is to seek long-term capital appreciation.

Shares of the Fund are listed and traded on The Nasdaq Stock Market, LLC (the “Exchange”). Market prices for the shares may be different from their net asset value (“NAV”). The Fund issues and redeems shares on a continuous basis at NAV only in blocks of 10,000 shares, called “Creation Units.” Creation Units are issued and redeemed principally in-kind for securities included in a specified universe. Once created, shares generally trade in the secondary market at market prices that change throughout the day in share amounts less than a Creation Unit. Except when aggregated in Creation Units, shares are not redeemable securities of the Fund. Shares of the Fund may only be purchased or redeemed by certain financial institutions (“Authorized Participants”). An Authorized Participant is a participant of a clearing agency registered with the SEC, which has a written agreement with the Trust or one of its service providers that allows the authorized participant to place orders for the purchase and redemption of creation units. Most retail investors do not qualify as Authorized Participants nor have the resources to buy and sell whole Creation Units. Therefore, they are unable to purchase or redeem the shares directly from the Fund. Rather, most retail investors may purchase shares in the secondary market with the assistance of a broker and are subject to customary brokerage commissions or fees.

Authorized Participants may be required to pay a transaction fee to compensate the Trust or its custodian for costs incurred in connection with creation and redemption transactions. Certain transactions consisting all or partially of cash may also be subject to a variable charge, which is payable to the relevant Fund, of up to 2.00% of the value of the order in addition to the transaction fee. A Fund may determine to waive the variable charge on certain orders when such waiver is determined to be in the best interests of Fund shareholders. Transaction fees received by a Fund, if any, are displayed in the Capital Share Transactions sections of the Statements of Changes in Net Assets.

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund. These policies are in conformity with accounting principles generally accepted in the United States of America (“GAAP”).

- A. *Security Valuation.* Equity securities that are traded on a national securities exchange, except those listed on the NASDAQ Global Market® (“NASDAQ”) are valued at the last reported sale price on the exchange on which the security is principally traded. Securities traded on NASDAQ will be valued at the NASDAQ Official Closing Price (“NOCP”). If, on a particular day, an exchange-traded or NASDAQ security does not trade, then the most recent quoted bid for exchange-traded or the mean between the most recent quoted bid and ask price for NASDAQ securities will be used. Equity securities that are not traded on a listed exchange are generally valued at the last sale price in the over-the-counter market. If a non-exchange traded security does not trade on a particular day, then the mean between the last quoted closing bid and asked price will be used. Prices denominated in foreign currencies are converted to U.S. dollar equivalents at the current exchange rate, which approximates fair value. Redeemable securities issued by open-end investment companies are valued at the investment company’s applicable net asset value, with the exception of exchange-traded open-end investment companies which are priced as equity securities.

Subject to its oversight, the Trust’s Board of Trustees (the “Board”) has delegated primary responsibility for determining or causing to be determined the value of the Fund’s investments to Empowered Funds, LLC dba EA Advisers (the “Adviser”), pursuant to the Trust’s valuation policy and procedures, which have been adopted by the Trust and approved by the Board. In accordance with Rule 2a-5 under the 1940 Act, the Board designated the Adviser as the “valuation designee” of the Fund. If the Adviser, as valuation designee, determines that reliable

MKAM ETF

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

September 30, 2024 (Unaudited)

market quotations are not readily available for an investment, the investment is valued at fair value as determined in good faith by the Adviser in accordance with the Trust's fair valuation policy and procedures. The Adviser will provide the Board with periodic reports, no less frequently than quarterly, that discuss the functioning of the valuation process, if applicable, and that identify issues and valuation problems that have arisen, if any. As appropriate, the Adviser and the Board will review any securities valued by the Adviser in accordance with the Trust's valuation policies during these periodic reports. The use of fair value pricing by the Fund may cause the net asset value of its shares to differ significantly from the net asset value that would be calculated without regard to such considerations. As of September 30, 2024, the Fund did not hold any securities that required fair valuation due to unobservable inputs.

As described above, the Fund may use various methods to measure the fair value of their investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of inputs are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.

Level 2 – Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Level 3 – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available; representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The following is a summary of the fair value classification of the Fund's investments as of September 30, 2024:

DESCRIPTION	LEVEL 1	LEVEL 2	LEVEL 3	TOTAL
<u>Assets</u>				
Exchange Traded Funds	\$ 5,229,862	\$ —	\$ —	\$ 5,229,862
U.S. Treasury Securities	—	310,466	—	310,466
Money Market Funds	18,609	—	—	18,609
U.S. Treasury Bills	—	1,399,395	—	1,399,395
Total Investments in Securities	\$ 5,248,471	\$ 1,709,861	\$ —	\$ 6,958,332

Refer to the Schedule of Investments for additional information.

During the fiscal period ended September 30, 2024, the Fund did not invest in any Level 3 investments and recognized no transfers to/from Level 3. Transfers between levels are recognized at the end of the reporting period.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
September 30, 2024 (Unaudited)

- B. *Foreign Currency.* Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts using the spot rate of exchange at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions. The Fund isolates the portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. That portion of gains (losses) attributable to the changes in market prices and the portion of gains (losses) attributable to changes in foreign exchange rates are included on the “Statement of Operations” under “Net realized gain (loss) – Foreign currency” and “Change in Net Unrealized Appreciation (Depreciation) – Foreign Currency,” respectively.

The Fund reports net realized foreign exchange gains or losses that arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund’s books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the fair values of assets and liabilities, other than investments in securities at fiscal period end, resulting from changes in exchange rates.

- C. *Federal Income Taxes.* The Fund intends to continue to comply with the requirements of subchapter M of the Internal Revenue Code of 1986, as amended, as necessary to qualify as a regulated investment company and distribute substantially all net taxable investment income and net realized gains to shareholders in a manner which results in no tax cost to the Fund. Therefore, no federal income tax provision is required. As of and during the fiscal period ended September 30, 2024, the Fund did not have any tax positions that did not meet the “more-likely-than-not” threshold of being sustained by the applicable tax authority. As of and during the fiscal period ended September 30, 2024, the Fund did not have liabilities for any unrecognized tax benefits. The Fund would/will recognize interest and penalties, if any, related to unrecognized tax benefits on uncertain tax positions as income tax expense in the Statement of Operations. During the fiscal period ended September 30, 2024, the Fund did not incur any interest or penalties. The Fund is subject to examination by U.S. taxing authorities for the tax periods since the Fund’s commencement of operations.

The Fund may be subject to taxes imposed on realized and unrealized gains on securities of certain foreign countries in which the Fund invests. The foreign tax expense, if any, was recorded on an accrual basis and is included in “Net realized gain (loss) on investments” and “Net increase (decrease) in unrealized appreciation or depreciation on investments” on the accompanying Statements of Operations. The amount of foreign tax owed, if any, is included in “Payable for foreign taxes” on the accompanying Statements of Assets and Liabilities and is comprised of and taxes on unrealized gains.

- D. *Security Transactions and Investment Income.* Investment securities transactions are accounted for on the trade date. Gains and losses realized on sales of securities are determined on a specific identification basis. Dividend income is recorded on the ex-dividend date, net of any foreign taxes withheld at source. Interest income is recorded on an accrual basis. Withholding taxes on foreign dividends have been provided for in accordance with the Fund’s understanding of the applicable tax rules and regulations.

Distributions to shareholders from net investment income for the Fund are declared and paid on a quarterly basis and distributions to shareholders from net realized gains on securities normally are declared and paid on an annual basis. Distributions are recorded on the ex-dividend date. The Fund may distribute more frequently, if necessary, for tax purposes.

- E. *Use of Estimates.* The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, as well as the reported amounts of increases and decreases in net assets from operations during the period. Actual results could differ from those estimates.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
September 30, 2024 (Unaudited)

- F. *Share Valuation.* The NAV per share of the Fund is calculated by dividing the sum of the value of the securities held by the Fund, plus cash and other assets, minus all liabilities (including estimated accrued expenses) by the total number of shares outstanding for the Fund, rounded to the nearest cent. The Fund's shares will not be priced on the days on which the New York Stock Exchange ("NYSE") is closed for regular trading. The offering and redemption price per share for the Fund is equal to the Fund's net asset value per share.
- G. *Guarantees and Indemnifications.* In the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. Additionally, as is customary, the Trust's organizational documents permit the Trust to indemnify its officers and trustees against certain liabilities under certain circumstances. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be against the Fund that have not yet occurred. As of the date of this Report, no claim has been made for indemnification pursuant to any such agreement of the Fund.
- H. *Reclassification of Capital Accounts.* GAAP requires that certain components of net assets relating to permanent differences be reclassified between financial and tax reporting. These reclassifications have no effect on net assets or net asset value per share. GAAP requires that certain components of net assets relating to permanent differences be reclassified between financial and tax reporting. For the fiscal period ended March 31, 2024, the following table shows the reclassifications made:

Distributable Earnings	Paid-in Capital
\$(56,649)	\$56,649

NOTE 3 – RISKS

Markets may perform poorly and the returns from the securities in which the Fund invests may underperform returns from the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions or intervention, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic or other news.

Investment Risk. When you sell your Shares, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Asset Allocation Risk. The Fund is also subject to asset allocation risk, which is the chance that the selection of investments, and the allocation of assets to such investments, will cause the Fund to underperform other funds with a similar investment objective.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

Large-Capitalization Companies Risk. Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

Mid-Capitalization Companies Risk. Investing in securities of mid-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
September 30, 2024 (Unaudited)

volatile and less liquid than those of more established companies. Often mid-capitalization companies and the industries in which they focus are still evolving and, as a result, they may be more sensitive to changing market conditions.

Management Risk. The Fund is actively managed and may not meet its investment objective based on the Adviser's or Sub-Adviser's success or failure to implement investment strategies for the Fund. The success of the Fund's investment program depends largely on the investment techniques and risk analyses applied by the Sub-Adviser, including the use of quantitative models or methods. It is possible the investment techniques and risk analyses employed on behalf of the Fund will not produce the desired results.

Quantitative Security Selection Risk. Data for some issuers may be less available and/or less current than data for issuers in other markets. The Sub-Adviser uses quantitative models in conjunction with fundamental analysis, and its processes could be adversely affected if erroneous or outdated data is utilized. In addition, securities selected using a quantitative model could perform differently from the financial markets as a whole as a result of the characteristics used in the analysis, the weight placed on each characteristic and changes in the characteristic's historical trends. The factors used in those analyses may not be predictive of a security's value and its effectiveness can change over time. These changes may not be reflected in the quantitative models. In addition, the investment models used in making investment decisions may not adequately consider certain factors, or may contain design flaws or faulty assumptions, any of which may result in a decline in the value of an investment in the Fund.

Fixed-Income Risk. The market value of fixed-income securities will change in response to interest rate changes and other factors, such as changes in the effective maturities and credit ratings of fixed-income investments. During periods of falling interest rates, the values of outstanding fixed-income securities and related financial instruments generally rise. Conversely, during periods of rising interest rates, the values of such securities and related financial instruments generally decline. Fixed-income investments are also subject to credit risk.

Interest Rate Risk. Changes in interest rates can result in losses for fixed-income and other securities. Specifically, for fixed-income securities or fixed-income ETFs, when interest rates rise, the market values of the fixed-income instruments normally decrease. Typically, the longer the maturity or duration of a fixed-income security, the greater the security's sensitivity to changes in interest rates. Changes in monetary policy, government policy, government spending and inflation may affect the level of interest rates.

Credit Risk. Debt securities are subject to credit risk. Credit risk refers to the possibility that the issuer or guarantor of a security will be unable and/or unwilling to make timely interest payments and/or repay the principal on its debt or to otherwise honor its obligations and/or default completely. Debt securities are subject to varying degrees of credit risk, depending on the issuer's financial condition and on the terms of the securities, which may be reflected in credit ratings. There is a possibility that the credit rating of a debt security may be downgraded after purchase or the perception of an issuer's credit worthiness may decline, which may adversely affect the value of the security.

Risk of U.S. Treasury Bills. Direct obligations of the U.S. Treasury have historically involved little risk of loss of principal if held to maturity. However, due to fluctuations in interest rates, the market value of such securities may vary.

Cash and Cash Equivalents Risk. Holding cash or cash equivalents rather than securities or other instruments in which the Fund primarily invests, even strategically, may cause the Fund to risk losing opportunities to participate in market appreciation, and may cause the Fund to experience potentially lower returns than the Fund's benchmark or other funds that remain fully invested. In rising markets, holding cash or cash equivalents will negatively affect the Fund's performance relative to its benchmark.

Options Risk. The value of the Fund's positions in index options will fluctuate in response to changes in the value of the underlying index. The Fund risks losing all or part of the cash paid for purchasing index put options. Unusual market conditions or the lack of a ready market for any particular option at a specific time may reduce the effectiveness of the Fund's option strategies, and for these and other reasons the Fund's option strategies may not reduce the Fund's volatility to the extent desired.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
September 30, 2024 (Unaudited)

Futures Contract Risk. The successful use of futures contracts draws upon the Sub-Adviser's skill and experience with respect to such instruments and is subject to special risk considerations. The primary risks associated with the use of futures contracts, which may adversely affect the Fund's NAV and total return, are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the futures contract; (b) possible lack of a liquid secondary market for a futures contract and the resulting inability to close a futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Sub-Adviser's inability to predict correctly the direction of securities prices, interest rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.

Hedging Transactions Risk. The Sub-Adviser from time to time employs various hedging techniques. The success of the Fund's hedging strategy will be subject to the Sub-Adviser's ability to correctly assess the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged. Since the characteristics of many securities change as markets change or time passes, the success of the Fund's hedging strategy will also be subject to the Sub-Adviser's ability to continually recalculate, readjust, and execute hedges in an efficient and timely manner. For a variety of reasons, the Sub-Adviser may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Such imperfect correlation may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. In addition, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own costs (such as trading commissions and fees).

Leverage Risk. Use of derivative instruments may involve leverage. Leverage is the risk associated with securities or investment practices that multiply small index, market or asset-price movements into larger changes in value. Leverage magnifies the potential for gain and the risk of loss. As a result, a relatively small decline in the value of the underlying investments could result in a relatively large loss. The use of leverage will increase the impact of gains and losses on the Fund's returns, and may lead to significant losses if investments are not successful.

Investment Company Risk. An investment in other registered investment companies is subject to the risks associated with those investment companies, which include, but are not limited to, the risk that such fund's investment strategy may not produce the intended results; the risk that securities in such fund may underperform in comparison to the general securities markets or other asset classes; and the risk that the fund will be concentrated in a particular issuer, market, industry or sector, and therefore will be especially susceptible to loss due to adverse occurrences affecting that issuer, market, industry or sector. Moreover, the Fund will incur duplicative expenses from such investments, bearing its share of that fund's expenses while also paying its own advisory fees and trading costs.

An ETF may also trade at a discount to its net asset value. This could, in turn, result in differences between the market price of the ETF's shares and the underlying value of those shares. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of ETFs. In addition, the Fund may invest in underlying funds which invest a larger portion of their assets in one or more sectors than many other mutual funds, and thus will be more susceptible to negative events affecting those sectors.

Non-Diversification Risk. Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

Geopolitical/Natural Disaster Risks. The Fund's investments are subject to geopolitical and natural disaster risks, such as war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises and related geopolitical events, as well as environmental disasters, epidemics and/or pandemics, which may add to instability in world economies and volatility in markets. The impact may be short-term or may last for extended periods.

See the Fund's Prospectus and Statement of Additional Information regarding the risks of investing in shares of the Fund.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
September 30, 2024 (Unaudited)**NOTE 4 – COMMITMENTS AND OTHER RELATED PARTY TRANSACTIONS.**

Empowered Funds, LLC dba EA Advisers (the “Adviser”) serves as the investment adviser to the Fund. Pursuant to an investment advisory agreement (the “Advisory Agreement”) between the Trust, on behalf of the Fund, and the Adviser, the Adviser provides investment advice to the Fund and oversees the day-to-day operations of the Fund, subject to the direction and control of the Board and the officers of the Trust. Under the Advisory Agreement, the Adviser is also responsible for arranging transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for the Fund to operate. The Adviser administers the Fund’s business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services. The Adviser agrees to pay all expenses incurred by the Fund except for the fee paid to the Adviser pursuant to the Advisory Agreement, payments under any distribution plan adopted pursuant to Rule 12b-1, brokerage expenses, acquired fund fees and expenses, taxes (including tax-related services), interest (including borrowing costs), litigation expense (including class action-related services) and other non-routine or extraordinary expenses. Per the Advisory Agreement, the Fund pays an annual rate of 0.94% to the Adviser monthly based on average daily net assets.

MKAM ETF LLC, serves as a non-discretionary investment sub-adviser to the Fund. Pursuant to an investment sub-advisory agreement (the “Sub-Advisory Agreement”) among the Trust, the Adviser and the Sub-Adviser, the Sub-Adviser is responsible for determining the investment exposures for the Fund, subject to the overall supervision and oversight of the Adviser and the Board.

U.S. Bancorp Fund Services, LLC (“Fund Services” or “Administrator”), doing business as U.S. Bank Global Fund Services, acts as the Funds’ Administrator and, in that capacity, performs various administrative and accounting services for the Funds. The Administrator prepares various federal and state regulatory filings, reports and returns for the Funds, including regulatory compliance monitoring and financial reporting; prepares reports and materials to be supplied to the trustees; monitors the activities of the Funds’ Custodian, transfer agent and fund accountant. Fund Services also serves as the transfer agent and fund accountant to the Funds. U.S. Bank N.A. (the “Custodian”), an affiliate of the Administrator, serves as the Funds’ Custodian.

The Custodian acts as the securities lending agent (the “Securities Lending Agent”) for the Fund.

NOTE 5 – SECURITIES LENDING

The Fund may lend up to 33^{1/3}% of the value of the securities in its portfolio to brokers, dealers and financial institutions (but not individuals) under terms of participation in a securities lending program administered by the Securities Lending Agent. The securities lending agreement requires that loans are collateralized at all times in an amount equal to at least 102% of the value of any domestic loaned securities at the time of the loan, plus accrued interest. The use of loans of foreign securities, which are denominated and payable in U.S. dollars, shall be collateralized in an amount equal to 105% of the value of any loaned securities at the time of the loan plus accrued interest. The Fund receives compensation in the form of fees and earns interest on the cash collateral. The amount of fees depends on a number of factors including the type of security and length of the loan. The Fund continues to receive interest payments or dividends on the securities loaned during the borrowing period. Gain or loss on the value of securities loaned that may occur during the term of the loan will be for the account of the Fund. The Fund has the right under the terms of the securities lending agreement to recall the securities from the borrower on demand.

The securities lending agreement provides that, in the event of a borrower’s material default, the Securities Lending Agent shall take all actions the Securities Lending Agent deems appropriate to liquidate the collateral, purchase replacement securities at the Securities Lending Agent’s expense or pay the Fund an amount equal to the market value of the loaned securities, subject to certain limitations which are set forth in detail in the securities lending agreement between the Fund and the Securities Lending Agent.

During the fiscal period, the Fund had not loaned securities and received cash collateral for the loans. The cash collateral is invested by the Securities Lending Agent in accordance with the Trust approved investment guidelines. Those guidelines require the cash collateral to be invested in readily marketable, high quality, short-term obligations; however, such

investments are subject to risk of payment delays or default on the part of the issuer or counterparty or otherwise may not generate sufficient interest to support the costs associated with securities lending. The Fund could also experience delays in recovering its securities and possible loss of income or value if the borrower fails to return the borrowed securities, although the Fund is indemnified from this risk by contract with the Securities Lending Agent. As of the end of the fiscal period, the Fund did not have any securities on loan.

The interest income earned by the Fund on the investment of cash collateral received from borrowers for the securities loaned to them (“Securities Lending Income, Net”) would have been reflected in the Fund’s Statement of Operations. As of the end of the fiscal period, there was no net securities lending income earned on collateral investments.

Due to the absence of a master netting agreement related to the Fund’s participation in securities lending, no additional offsetting disclosures have been made on behalf of the Fund for the total borrowings listed above.

NOTE 6 – PURCHASES AND SALES OF SECURITIES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
September 30, 2024 (Unaudited)

The difference between book and tax-basis cost is attributable to wash sales. Under tax law, certain capital and foreign currency losses realized after October 31st and within the taxable year are deemed to arise on the first business day of the Fund's next taxable year.

For the fiscal period ended March 31, 2024, the Fund did not defer, on a tax basis, any qualified late year losses or post-October capital losses.

At March 31, 2024, the Fund had the following capital loss carryforwards that do not expire:

<u>Unlimited Short-Term</u>	<u>Unlimited Long-Term</u>
\$ (3,193)	\$ —

NOTE 8 – DISTRIBUTIONS TO SHAREHOLDERS

The tax character of distributions paid by the Fund during the fiscal periods ended September 30, 2024 and March 31, 2024 were as follows:

<u>Fiscal Period Ended September 30, 2024</u>	<u>Fiscal Year Ended March 31, 2024</u>
<u>Ordinary Income</u>	<u>Ordinary Income</u>
\$55,071	\$112,388

NOTE 9 – SUBSEQUENT EVENTS

In preparing these financial statements, management of the Fund has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued. There were no other transactions that occurred during the period subsequent to September 30, 2024 that materially impacted the amounts or disclosures in the Fund's financial statements.
