## ASTORIA US SMALL CAP QUALITY GROWTH KINGS ETF

### Fund Summary

#### INVESTMENT OBJECTIVE

The Astoria US Small Cap Quality Growth Kings ETF (the “Fund”) seeks to provide long-term capital appreciation.

#### FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table or example.**

##### **Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)**

Management Fee	0.45%
Distribution and/or Service (12b-1) Fees	None
Other Expenses <sup>1</sup>	0.00%
<b>Total Annual Fund Operating Expenses</b>	<b>0.45%</b>

<sup>1</sup> Other Expenses are estimated for the current fiscal year.

#### EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then hold or sell all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>One Year:</b>	<b>Three Years:</b>
\$46	\$144

#### PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. As of the date of this Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

#### PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in small-capitalization (“small cap”) companies whose shares are principally traded in the United States and which the Fund’s sub-adviser, Astoria Portfolio Advisors, LLC (the “Sub-Adviser”), believes have the potential for growth.

The Fund seeks to invest in companies that exhibit robust quality and growth characteristics across sectors, as determined by the Sub-Adviser. The Sub-Adviser generally considers a robust quality company as one with higher than median return on equity, return on assets, and return on invested capital compared to its sector peers. In addition, the Sub-Adviser generally considers a growth company as one with higher than median price/earnings, sales, or earnings growth compared to sector peers. The Sub-Adviser believes growth companies generally demonstrate strong growth potential through development of new products and technologies and/or have a strong industry or market position. The Fund is not managed to mirror a particular securities index or securities benchmark. Rather, the Sub-Adviser uses a quantitative and systematic approach to select securities for the Fund.

The Sub-Adviser constructs the Fund’s portfolio by evaluating all of the securities in an investment universe comprised of publicly traded U.S.-listed stocks of small cap companies (typically companies with a market capitalization in the range of common small cap indexes, generally less than \$15 billion) that are considered to be sufficiently liquid by the Sub-Adviser, as measured by their average daily value traded and free float percentage. Proprietary quantitative screens developed by the Sub-Adviser are used to rank such stocks according to their quality and growth metrics relative to the median of their sector peers. The Sub-Adviser uses a variety of metrics in its discretion to evaluate each stock for each of these factors, including return on equity, return on investment capital, price-to-earnings ratio, estimate revisions, projected growth estimates, and earnings momentum. These factors are subject to change over time. The Sub-Adviser believes that companies with greater than median return on equity, return on investment capital, projected growth rates and/or lower than median price-to-earnings-growth ratio relative to their sector peers are good indicators of company’s investment merit. In addition, the Sub-Adviser believes positive revisions to

earnings estimates are generally a sign of potential attractive growth. Momentum investing aims to capitalize on the continuance of an existing market trend (e.g., positive and accelerating growth of earnings). The metrics used to evaluate each factor vary by sector based on the Sub-Adviser's assessment of which metric(s) have historically provided the best measure of that factor. A weighted average rank across each factor is then calculated and the top 65 to 100 ranked stocks are selected for the Fund. The number of stocks selected will vary based on the Sub-Adviser's decision to overweight or underweight sectors in accordance with its assessment of the markets at the time of screening and to maintain sector diversification in the Fund's portfolio.

All stocks in the portfolio are monitored daily by the Sub-Adviser. In addition, the Sub-Adviser's quantitative screens are reviewed on a quarterly basis to monitor the ranking of the stocks according to their quality and growth metrics. The Fund will sell or reduce positions according to changes in the Sub-Adviser's proprietary rankings. The screens may be reapplied more frequently if there are material changes to earnings, valuations, or economic trends (i.e., an accelerating economy) believed by the Sub-Adviser to likely have an impact on the Fund's portfolio. While it is anticipated that the Fund will invest across a range of industries, certain sectors may be overweighted relative to its benchmark because the Sub-Adviser seeks the best investment opportunities regardless of sector in its discretion based on its assessment of the markets.

The Sub-Adviser defines a growth company for purposes of the Fund's 80% policy as a company with a price/earnings ratio, sales growth rate, or earnings growth rate in the top two-thirds of companies in the same sector. For purposes of the Fund's 80% policy, a small cap company is one with a market capitalization of less than \$15 billion or less than the market capitalization of the 500 largest companies whose stock is listed in the United States.

The Fund is classified as "non-diversified" under the Investment Company Act of 1940, as amended, which means the Fund may take larger positions in a fewer number of issuers.

## **PRINCIPAL INVESTMENT RISKS**

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. More complete risk descriptions are set forth below under the heading "*Additional Information About the Fund's Principal Investment Risks.*"

**Quality Stocks Risk.** Stocks included in the Fund are deemed by the Sub-Adviser to be quality stocks, but there is no guarantee that the past performance of these stocks will continue. Companies that issue these stocks may experience a decline in value, as well as increased leverage, resulting in lower than expected or negative returns to Fund shareholders. Many factors can affect a stock's quality and performance, and the impact of these factors on a stock or its price can be difficult to predict.

**Management Risk.** The Fund is actively-managed and may not meet its investment objective based on the Adviser's, Sub-Adviser's, or portfolio managers' success or failure to implement investment strategies for the Fund.

**Small-Capitalization Companies Risk.** Investing in securities of small-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. Small-capitalization companies often have less predictable earnings, more limited product lines, markets, distribution channels and financial resources, and the management of such companies may be dependent upon one or few people. Price movements of small-capitalization companies may be more volatile than mid-capitalization and large-capitalization companies.

**Growth Investing Risk.** The Fund invests in growth securities, which may be more volatile than other types of investments, may perform differently than the market as a whole and may underperform when compared to securities with different investment parameters. Under certain market conditions, growth securities have performed better during the later stages of economic recovery (although there is no guarantee that they will continue to do so). Therefore, growth securities may go in and out of favor over time.

**Risk of Investing in the U.S.** Certain changes in the U.S. economy, such as when the U.S. economy weakens or when its financial markets decline, may have an adverse effect on the securities to which the Fund has exposure.

**Investment Risk.** When you sell your Shares, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security, such as geopolitical events and environmental disasters. The value of a security may also decline due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

**Equity Investing Risk.** An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

**Quantitative Security Selection Risk.** Data for some companies may be less available and/or less current than data for companies in other markets. The Sub-Adviser uses quantitative analysis, and its processes could be adversely affected if erroneous or outdated data is utilized. The securities selected using quantitative analysis could perform differently from the financial markets as a whole as a result of the characteristics used in the analysis, the weight placed on each characteristic and changes in the characteristic's historical trends. In addition, the investment analysis used in making investment decisions may not adequately consider certain factors, or may contain design flaws or faulty assumptions, any of which may result in a decline in the value of an investment in the Fund.

**Sector Risk.** To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors and the performance of the Fund could be negatively impacted by events affecting such sectors.

#### **ETF Risks.**

- *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Premium-Discount Risk.* The Shares may trade above or below their net asset value ("NAV"). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on The Nasdaq Stock Market LLC (the "Exchange") or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares. In addition, you may incur the cost of the "spread," that is, any difference between the bid price and the ask price of the Shares.
- *Cost of Trading Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares.
- *Trading Risk.* Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be less liquid than Shares, potentially causing the market price of Shares to deviate from its NAV. The spread varies over time for Shares of the Fund based on the Fund's trading volume and market liquidity and is generally lower if the Fund has high trading volume and market liquidity, and higher if the Fund has little trading volume and market liquidity (which is often the case for funds that are newly launched or small in size).

**New Fund Risk.** The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

**Non-Diversification Risk.** Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

#### **PERFORMANCE**

Performance information is not provided below because the Fund has not yet been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund's average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Updated performance information will be available at <https://astoriaadvisorssetfs.com>.

#### **INVESTMENT ADVISER & INVESTMENT SUB-ADVISER**

Investment Adviser: Empowered Funds, LLC dba EA Advisers (the "Adviser")  
Investment Sub-Adviser: Astoria Portfolio Advisors, LLC (the "Sub-Adviser")

#### **PORTFOLIO MANAGER**

John Davi, the Founder, Chief Executive Officer and Chief Investment Officer of the Sub-Adviser, and Nick Cerbone, Vice President and Quantitative Strategist of the Sub-Adviser, are the Fund's portfolio managers and have been primarily responsible for the day-to-day management of the Fund since its inception in 2025.

## **PURCHASE AND SALE OF SHARES**

The Fund issues and redeems Shares on a continuous basis only in large blocks of Shares known as “Creation Units,” and only APs (typically, broker-dealers) may purchase or redeem Creation Units. Creation Units generally are issued and redeemed ‘in-kind’ for securities and partially in cash. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Once created, individual Shares generally trade in the secondary market at market prices that change throughout the day. Market prices of Shares may be greater or less than their NAV. **Except when aggregated in Creation Units, the Fund’s shares are not redeemable securities.**

## **TAX INFORMATION**

The Fund’s distributions generally are taxable to you as ordinary income, capital gain, or some combination of both, unless your investment is made through an Individual Retirement Account (“IRA”) or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your own tax advisor about your specific tax situation.

## **PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

## ASTORIA DYNAMIC CORE US FIXED INCOME ETF

### Fund Summary

#### INVESTMENT OBJECTIVE

The Astoria Dynamic Core US Fixed Income ETF (the “Fund”) seeks current income.

#### FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table or example.**

<b>Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)</b>	
Management Fee	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses <sup>1</sup>	0.00%
Acquired Fund Fees and Expenses <sup>1</sup>	0.08%
<b>Total Annual Fund Operating Expenses</b>	<b>0.56%</b>

<sup>1</sup> Other Expenses and Acquired Fund Fees and Expenses are estimated for the current fiscal year. “Acquired Fund Fees and Expenses” (“AFFE”) are indirect fees and expenses that the Fund incurs from investing in the shares of other investment companies.

#### EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then hold or sell all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>One Year:</b>	<b>Three Years:</b>
\$57	\$179

#### PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. As of the date of this Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

#### PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by investing primarily in other U.S. fixed income ETFs (“Underlying U.S. Fixed Income Funds”). Under normal circumstances, the Fund will invest at least 80% of its net assets (plus the amount of borrowing for investment purposes) directly or indirectly in U.S. fixed income securities. The Fund operates as a “fund of funds” and allocates its assets among Underlying U.S. Fixed Income Funds that invest in a variety of fixed income sectors, including, but not limited to, U.S. Treasuries and other debt securities issued by the U.S. Government and its agencies and instrumentalities, corporate bonds, mortgage-backed and asset-backed securities, municipal bonds, and high-yield bonds. The Fund generally considers a fixed income security to be a U.S. security if: (i) at least 50% of the issuer’s assets are located in the United States; (ii) at least 50% of the issuer’s revenue is generated in the United States; (iii) the issuer is organized, conducts its principal operations, or maintains its principal place of business or principal manufacturing facilities in the United States; or (iv) the issuer’s securities are traded principally in the United States. The Fund may also invest at times in other ETFs that provide exposure to fixed-income securities of non-U.S. issuers (together with Underlying U.S. Fixed Income Funds, “Underlying Funds”), including emerging market debt securities, which would typically include countries such as China, India, Taiwan, Thailand, Russia, and others. The Fund, however, defers to each Underlying Fund’s definition of “U.S.” and “emerging markets,” and the Underlying Funds’ definitions may differ from one another. The Fund may invest in fixed income securities of any credit quality and any maturity.

The Fund’s investment strategy is designed to provide core fixed income exposure while seeking to outperform traditional broad-based fixed income benchmarks through active management. The Fund targets a diversified allocation to Underlying Funds representing what the Sub-Adviser identifies as key sectors of the fixed income market (e.g., U.S. Treasuries, corporate bonds, mortgage-backed securities), with adjustments made to reflect current market conditions, credit risk, and interest rate dynamics. The Fund’s active management approach seeks to optimize risk-adjusted returns over a full market cycle.

Astor Investment Management, LLC (“Astor”) and Astoria Portfolio Advisors, LLC (“Astoria” and collectively with Astor, the “Sub-Advisers”) will serve as the Sub-Advisers for the Fund. In seeking to generate outperformance, the Sub-Advisers employ a proprietary investment process to determine the Fund’s allocations among asset classes, utilizing fundamental analysis that includes:

- *Rate Analysis:* Assessing macroeconomic indicators, monetary policy, and market expectations to form a view on the direction of interest rates. This analysis helps guide the Fund’s allocation to duration-sensitive sectors such as U.S. Treasuries or investment-grade corporate bonds.
- *Credit Analysis:* Evaluating credit quality trends, spreads, and risk-reward opportunities within various sectors to identify attractive Underlying Funds with exposure to higher-yielding securities, such as high-yield bonds or emerging market debt.
- *Sector Allocation:* Adjusting the Fund’s allocations to specific fixed income sectors based on their relative valuation and risk characteristics, while maintaining a focus on diversification and downside protection.

It is expected that the Fund will generally hold 5 to 15 Underlying Funds. The Fund’s portfolio management team regularly reviews and rebalances the Fund’s holdings to align with its investment objectives and market outlook. While the Fund seeks to maintain a core allocation to fixed income, it may overweight or underweight particular sectors or asset classes within its fixed income investments in response to changes in market conditions or as part of its active strategy. The Underlying Funds selected for inclusion in the portfolio may include both actively managed and passively managed ETFs. The Fund may also invest in cash or cash equivalents for liquidity or defensive purposes.

The Fund is a “non-diversified” fund, which means it can invest in fewer securities at any one time than a diversified fund and can invest more of its assets in securities of a single issuer than a diversified fund. The Fund may invest a significant percentage of its assets in one or more ETFs.

## PRINCIPAL INVESTMENT RISKS

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. More complete risk descriptions are set forth below under the heading “*Additional Information About the Fund’s Principal Investment Risks.*”

**Management Risk.** The Fund is actively-managed and may not meet its investment objective based on the Adviser’s, Sub-Adviser’s, or portfolio managers’ success or failure to implement investment strategies for the Fund.

**Fixed Income Securities Risks.** The Fund will be subject to fixed income securities risk through its investments in Underlying Funds.

- *Credit Risk.* The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund’s portfolio investments and/or perceptions related thereto.
- *Interest Rate Risk.* Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Interest rate changes can be sudden and unpredictable, and the Fund may lose money as a result of movements in interest rates. Recent and potential future changes in monetary policy made by central banks or governments are likely to affect the level of interest rates.

**Mortgage-Backed and Asset Backed Securities Risk.** Mortgage-backed and asset-backed securities represent interests in “pools” of mortgages or other assets, including consumer loans or receivables held in trust. Mortgage-backed securities are subject to “prepayment risk” (the risk that borrowers will repay a loan more quickly in periods of falling interest rates) and “extension risk” (the risk that borrowers will repay a loan more slowly in periods of rising interest rates). If an Underlying Fund invests in mortgage-backed or asset-backed securities that are subordinated to other interests in the same pool, the Underlying Fund may only receive payments after the pool’s obligations to other investors have been satisfied. An unexpectedly high rate of defaults on the assets held by a pool may limit substantially the pool’s ability to make payments of principal or interest to the Fund, reducing the values of those securities or in some cases rendering them worthless. The Underlying Funds’ investments in other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

**High-Yield Debt Securities (Junk Bonds) Risk.** High-yield securities (also known as “junk bonds”) carry a greater degree of risk and are considered speculative by the major credit rating agencies. High-yield securities may be issued by companies that are restructuring, are smaller and less creditworthy, or are more highly indebted than other companies. This means that they may have

more difficulty making scheduled payments of principal and interest. Changes in the value of high-yield securities are influenced more by changes in the financial and business position of the issuing company than by changes in interest rates when compared to investment grade securities. High-yield securities have greater volatility because there is less certainty that principal and interest payments will be made as scheduled. An Underlying Fund's investments in high-yield securities expose it to a substantial degree of credit risk. These investments are considered speculative under traditional investment standards. Prices of high-yield securities will rise and fall primarily in response to actual or perceived changes in the issuer's financial health, although changes in market interest rates also will affect prices. High-yield securities may experience reduced liquidity and sudden and substantial decreases in price.

**Municipal Securities Risk.** Litigation, legislation or other political events, local business or economic conditions or the bankruptcy of the issuer could have a significant effect on the ability of an issuer of municipal securities to make payments of principal and/or interest. Political changes and uncertainties in the municipal market related to taxation, legislative changes or the rights of municipal security holders can significantly affect municipal securities. Because many securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal market. In addition, changes in the financial condition of an individual municipal issuer can affect the overall municipal market. If the Internal Revenue Service ("IRS") determines that an issuer of a municipal security has not complied with applicable tax requirements, interest from the security could become taxable and the security could decline significantly in value.

**Foreign Fixed-Income Investment Risk.** Investments by Underlying Funds in fixed-income securities of non-U.S. issuers are subject to the same risks as other debt securities, notably credit risk, market risk, and interest rate risk, while also facing risks beyond those associated with investments in U.S. securities. For example, foreign securities may have relatively low market liquidity, greater market volatility, decreased publicly available information, and less reliable financial information about issuers, and inconsistent and potentially less stringent accounting, auditing and financial reporting requirements and standards of practice, including recordkeeping standards, comparable to those applicable to domestic issuers. Foreign securities also are subject to the risks of expropriation, nationalization, political instability or other adverse political or economic developments and the difficulty of enforcing obligations in other countries. Investments in foreign securities also may be subject to dividend withholding or confiscatory taxes, currency blockage and/or transfer restrictions and higher transactional costs.

**Emerging Markets Risk.** An Underlying Fund may invest in companies organized in emerging market nations. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to those securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Those conditions may impact the ability of the Underlying Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Underlying Fund to decline in value. Many emerging market countries have a history of, and continue to experience serious, and potentially continuing, economic and political problems. Similar to foreign issuers, emerging market issuers may not be subject to uniform accounting, auditing and financial reporting standards and there may be less publicly available financial and other information about such issuers, comparable to U.S. issuers. Securities in emerging markets also may be less liquid than those in developed markets and foreigners are often limited in their ability to invest in, and withdraw assets from, these markets. Additional restrictions may be imposed under other conditions.

**Asset Allocation Risk.** The Fund is also subject to asset allocation risk, which is the chance that the selection of investments, and the allocation of assets to such investments, will cause the Fund to underperform other funds with a similar investment objective.

**Risk of Investing in the U.S.** Certain changes in the U.S. economy, such as when the U.S. economy weakens or when its financial markets decline, may have an adverse effect on the securities to which the Fund has exposure.

**Investment Risk.** When you sell your Shares, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security. Geopolitical and other risks, including war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises, and environmental disasters such as earthquakes, fire, and floods, may add to instability in world economies and volatility in markets generally. Changes in trade policies and international trade agreements could affect the economies of many countries in unpredictable ways. The value of a security may also decline due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

**Fund of Funds Risk.** Because it invests primarily in other funds, the Fund's investment performance largely depends on the investment performance of the selected Underlying Funds. An investment in the Fund is subject to the risks associated with the Underlying Funds that then-currently comprise the Fund's portfolio. At times, certain of the segments of the market represented by the Underlying Funds may be out of favor and underperform other segments. The Fund will indirectly pay a proportional share of the expenses of the Underlying Funds in which it invests (including operating expenses and management fees), which are

identified in the fee schedule above as “Acquired Fund Fees and Expenses.” In addition, an Underlying Fund may also trade at a discount to its net asset value. This could, in turn, result in differences between the market price of the Underlying Fund’s shares and the underlying value of those shares. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of Underlying Funds.

#### **ETF Risks.**

- *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Premium-Discount Risk.* The Shares may trade above or below their net asset value (“NAV”). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on The Nasdaq Stock Market LLC (the “Exchange”) or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares. In addition, you may incur the cost of the “spread,” that is, any difference between the bid price and the ask price of the Shares.
- *Cost of Trading Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares.
- *Trading Risk.* Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be less liquid than Shares, potentially causing the market price of Shares to deviate from its NAV. The spread varies over time for Shares of the Fund based on the Fund’s trading volume and market liquidity and is generally lower if the Fund has high trading volume and market liquidity, and higher if the Fund has little trading volume and market liquidity (which is often the case for funds that are newly launched or small in size).

**New Fund Risk.** The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

**Non-Diversification Risk.** Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

#### **PERFORMANCE**

Performance information is not provided below because the Fund has not yet been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund’s average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Updated performance information will be available at <https://astoriaadvisorsetfs.com>.

#### **INVESTMENT ADVISER & INVESTMENT SUB-ADVISER**

Investment Adviser: Empowered Funds, LLC dba EA Advisers (the “Adviser”)  
Investment Sub-Advisers: Astoria Portfolio Advisors, LLC (“Astoria”)  
Astor Investment Management LLC (“Astor”)

#### **PORTFOLIO MANAGERS**

John Davi, the Founder, Chief Executive Officer and Chief Investment Officer of Astoria, and John “Jan” Eckstein, Chief Investment Officer of Astor, are the Fund’s portfolio managers and have been primarily responsible for the day-to-day management of the Fund since its inception in May 2025.

#### **PURCHASE AND SALE OF SHARES**

The Fund issues and redeems Shares on a continuous basis only in large blocks of Shares known as “Creation Units,” and only APs (typically, broker-dealers) may purchase or redeem Creation Units. Creation Units generally are issued and redeemed ‘in-kind’ for securities and partially in cash. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Once created, individual Shares generally trade in the secondary market at market prices that change throughout

the day. Market prices of Shares may be greater or less than their NAV. **Except when aggregated in Creation Units, the Fund's shares are not redeemable securities.**

## TAX INFORMATION

The Fund's distributions generally are taxable to you as ordinary income, capital gain, or some combination of both, unless your investment is made through an Individual Retirement Account ("IRA") or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your own tax advisor about your specific tax situation.

## PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

## ADDITIONAL INFORMATION ABOUT THE FUNDS' INVESTMENT OBJECTIVES AND PRINCIPAL INVESTMENT STRATEGIES

Each Fund's investment objective is a non-fundamental investment policy and may be changed without a vote of shareholders upon prior written notice to shareholders.

**Temporary Defensive Positions.** From time to time, each Fund may take temporary defensive positions that are inconsistent with its principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions. In those instances, a Fund may hold up to 100% of its assets in cash; short-term U.S. government securities and government agency securities; investment grade money market instruments; money market mutual funds; investment grade fixed income securities; repurchase agreements; commercial paper; cash equivalents; and exchange-traded investment vehicles that principally invest in the foregoing instruments. As a result of engaging in these temporary measures, a Fund may not achieve its investment objective.

## ADDITIONAL INFORMATION ABOUT THE FUNDS' PRINCIPAL INVESTMENT RISKS

The following information is in addition to, and should be read along with, the description of each Fund's principal investment risks in the sections titled "Fund Summary—Principal Investment Risks" above.

The following risks apply to both Funds:

### ETF Risks.

- *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* Each Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Premium-Discount Risk.* The Shares may trade above or below their net asset value ("NAV"). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on an Exchange or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares. In addition, you may incur the cost of the "spread," that is, any difference between the bid price and the ask price of the Shares.
- *Cost of Trading Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads.
- *Trading Risk.* Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. When markets are stressed, Shares could suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads,

which could cause some market makers and APs to reduce their market activity or “step away” from making a market in ETF shares. This could cause a Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the ETF arbitrage process. Further, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). There can be no assurance that the requirements of the Exchange necessary to maintain the listing of each Fund will continue to be met or will remain unchanged. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of a Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares, and this could lead to differences between the market price of the Shares and the underlying value of those Shares.

**Investment Risk.** When you sell your Shares, they could be worth less than what you paid for them. A Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security. Geopolitical and other risks, including war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises, and environmental disasters such as earthquakes, fire, and floods, may add to instability in world economies and volatility in markets generally. Changes in trade policies and international trade agreements could affect the economies of many countries in unpredictable ways. The value of a security may also decline due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in a Fund.

**Management Risk.** Each Fund is actively-managed and may not meet its investment objective based on the Adviser’s, Sub-Adviser’s, or portfolio managers’ success or failure to implement investment strategies for each Fund. The success of each Fund’s investment program depends largely on the investment techniques and risk analyses applied by the Adviser, Sub-Adviser, and the portfolio managers and the skill of the Adviser, Sub-Adviser, and/or portfolio managers in evaluating, selecting, and monitoring a Fund’s assets. Each Fund could experience losses (realized and unrealized) if the judgment of the Adviser, Sub-Adviser, or portfolio managers about markets or sectors or the attractiveness of particular investments made for a Fund’s portfolio prove to be incorrect. It is possible the investment techniques and risk analyses employed on behalf of a Fund will not produce the desired results. Absent unusual circumstances (e.g., the Adviser determines a different security has higher liquidity but offers a similar investment profile as a recommended security), the Adviser will generally follow the Sub-Adviser’s investment recommendations to buy, hold, and sell securities and financial instruments.

**New Fund Risk.** The Funds are a recently organized management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that each Fund will grow to or maintain an economically viable size.

**Non-Diversification Risk.** A non-diversified fund may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

**Risk of Investing in the U.S.** A decrease in imports or exports, changes in trade regulations, inflation and/or an economic recession in the U.S. may have a material adverse effect on the U.S. economy and the securities listed on U.S. exchanges. Proposed and adopted policy and legislative changes in the U.S. are changing many aspects of financial, commercial, public health, environmental, and other regulation and may have a significant effect on U.S. markets generally, as well as on the value of certain securities. Governmental agencies project that the U.S. will continue to maintain elevated public debt levels for the foreseeable future. Although elevated debt levels do not necessarily indicate or cause economic problems, elevated public debt service costs may constrain future economic growth. Circumstances could arise that could prevent the timely payment of interest or principal on U.S. government debt, such as reaching the legislative “debt ceiling.” Such non-payment would result in substantial negative consequences for the U.S. economy and the global financial system. If U.S. relations with certain countries deteriorate, it could adversely affect U.S. issuers as well as non-U.S. issuers that rely on the U.S. for trade. The U.S. has also experienced increased internal unrest and discord. If these trends were to continue, it may have an adverse impact on the U.S. economy and the issuers in which a Fund invests.

The following risks apply to the Astoria US Small Cap Quality Growth Kings ETF only:

**Equity Investing Risk.** An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of outperformance and underperformance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Recent turbulence in financial markets and reduced liquidity in credit and fixed income markets may negatively affect many issuers worldwide, which may have an adverse effect on the Fund.

**Growth Investing Risk.** The Fund invests in growth securities, which may be more volatile than other types of investments, may perform differently than the market as a whole and may underperform when compared to securities with different investment parameters. Under certain market conditions, growth securities have performed better during the later stages of economic recovery (although there is no guarantee that they will continue to do so). Therefore, growth securities may go in and out of favor over time.

**Quality Stocks Risk.** Stocks included in the Fund are deemed by the Sub-Adviser to be quality stocks, but there is no guarantee that the past performance of these stocks will continue. Companies that issue these stocks may experience a decline in value, as well as increased leverage, resulting in lower than expected or negative returns to Fund shareholders. Many factors can affect a stock's quality and performance, and the impact of these factors on a stock or its price can be difficult to predict.

**Quantitative Security Selection Risk.** Data for some issuers may be less available and/or less current than data for issuers in other markets. The Sub-Adviser uses quantitative models in conjunction with fundamental analysis, and its processes could be adversely affected if erroneous or outdated data is utilized. In addition, securities selected using a quantitative model could perform differently from the financial markets as a whole as a result of the characteristics used in the analysis, the weight placed on each characteristic and changes in the characteristic's historical trends. The factors used in those analyses may not be predictive of a security's value and its effectiveness can change over time. These changes may not be reflected in the quantitative models.

**Sector Risk.** To the extent the Fund invests more heavily in one sector or sub-sector of the market, it thereby presents a more concentrated risk and its performance will be especially sensitive to developments that significantly affect those sectors or sub-sectors. In addition, the value of the Fund's shares may change at different rates compared to the value of shares of a fund with investments in a more diversified mix of sectors and industries. An individual sector or sub-sector of the market may have above-average performance during particular periods but may also move up and down more than the broader market. The several industries that constitute a sector may all react in the same way to economic, political or regulatory events. The Fund's performance could also be affected if the sectors or sub-sectors do not perform as expected. Alternatively, the lack of exposure to one or more sectors or sub-sectors may adversely affect performance.

**Small-Capitalization Companies Risk.** Investing in securities of small-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. Small-capitalization companies often have less predictable earnings, more limited product lines, markets, distribution channels and financial resources, and the management of such companies may be dependent upon one or few people. Price movements of small-capitalization companies may be more volatile than mid-capitalization and large-capitalization companies.

The following risks apply to the Astoria Dynamic Core US Fixed Income ETF only:

**Asset Allocation Risk.** The Fund is also subject to asset allocation risk, which is the chance that the selection of investments, and the allocation of assets to such investments, will cause the Fund to underperform other funds with a similar investment objective.

**Emerging Markets Risk.** An Underlying Fund may invest in companies organized in emerging market nations. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to those securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Those conditions may impact the ability of the Underlying Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Underlying Fund to decline in value. Many emerging market countries have a history of, and continue to experience serious, and potentially continuing, economic and political problems. Similar to foreign issuers, emerging market issuers may not be subject to uniform accounting, auditing and financial reporting standards and there may be less publicly available financial and other information about such issuers, comparable to U.S. issuers. Securities in emerging markets also may be less liquid than those in developed markets and foreigners are often limited in their ability to invest in, and withdraw assets from, these markets. Additional restrictions may be imposed under other conditions.

**Fixed Income Securities Risks.** The Fund will be subject to fixed income securities risk through its investments in Underlying Funds.

- *Credit Risk.* The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.
- *Interest Rate Risk.* Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Interest rate changes can be sudden and unpredictable, and the Fund may lose money as a result of movements in interest rates. Recent and potential future changes in monetary policy made by central banks or governments are likely to affect the level of interest rates.

**Foreign Fixed-Income Investment Risk.** Investments by Underlying Funds in fixed-income securities of non-U.S. issuers are subject to the same risks as other debt securities, notably credit risk, market risk, and interest rate risk, while also facing risks beyond those associated with investments in U.S. securities. For example, foreign securities may have relatively low market liquidity, greater market volatility, decreased publicly available information, and less reliable financial information about issuers, and inconsistent and potentially less stringent accounting, auditing and financial reporting requirements and standards of practice, including recordkeeping standards, comparable to those applicable to domestic issuers. Foreign securities also are subject to the risks of expropriation, nationalization, political instability or other adverse political or economic developments and the difficulty of enforcing obligations in other countries. Investments in foreign securities also may be subject to dividend withholding or confiscatory taxes, currency blockage and/or transfer restrictions and higher transactional costs.

**Fund of Funds Risk.** Because it invests primarily in other funds, the Fund's investment performance largely depends on the investment performance of the selected Underlying Funds. An investment in the Fund is subject to the risks associated with the Underlying Funds that then-currently comprise the Fund's portfolio. At times, certain of the segments of the market represented by the Underlying Funds may be out of favor and underperform other segments. The Fund will indirectly pay a proportional share of the expenses of the Underlying Funds in which it invests (including operating expenses and management fees), which are identified in the fee schedule above as "Acquired Fund Fees and Expenses." In addition, an Underlying Fund may also trade at a discount to its net asset value. This could, in turn, result in differences between the market price of the Underlying Fund's shares and the underlying value of those shares. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of Underlying Funds.

**High-Yield Debt Securities (Junk Bonds) Risk.** High-yield securities (also known as "junk bonds") carry a greater degree of risk and are considered speculative by the major credit rating agencies. High-yield securities may be issued by companies that are restructuring, are smaller and less creditworthy, or are more highly indebted than other companies. This means that they may have more difficulty making scheduled payments of principal and interest. Changes in the value of high-yield securities are influenced more by changes in the financial and business position of the issuing company than by changes in interest rates when compared to investment grade securities. High-yield securities have greater volatility because there is less certainty that principal and interest payments will be made as scheduled. An Underlying Fund's investments in high-yield securities expose it to a substantial degree of credit risk. These investments are considered speculative under traditional investment standards. Prices of high-yield securities will rise and fall primarily in response to actual or perceived changes in the issuer's financial health, although changes in market interest rates also will affect prices. High-yield securities may experience reduced liquidity and sudden and substantial decreases in price.

**Mortgage-Backed and Asset Backed Securities Risk.** Mortgage-backed and asset-backed securities represent interests in "pools" of mortgages or other assets, including consumer loans or receivables held in trust. Mortgage-backed securities are subject to "prepayment risk" (the risk that borrowers will repay a loan more quickly in periods of falling interest rates) and "extension risk" (the risk that borrowers will repay a loan more slowly in periods of rising interest rates). If an Underlying Fund invests in mortgage-backed or asset-backed securities that are subordinated to other interests in the same pool, the Underlying Fund may only receive payments after the pool's obligations to other investors have been satisfied. An unexpectedly high rate of defaults on the assets held by a pool may limit substantially the pool's ability to make payments of principal or interest to the Fund, reducing the values of those securities or in some cases rendering them worthless. The Underlying Funds' investments in other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

**Municipal Securities Risk.** Litigation, legislation or other political events, local business or economic conditions or the bankruptcy of the issuer could have a significant effect on the ability of an issuer of municipal securities to make payments of principal and/or interest. Political changes and uncertainties in the municipal market related to taxation, legislative changes or the rights of municipal security holders can significantly affect municipal securities. Because many securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal market. In addition, changes in the financial condition of an individual municipal issuer can affect the overall municipal market. If the Internal Revenue Service ("IRS") determines that an issuer of a municipal security has not complied with applicable tax requirements, interest from the security could become taxable and the security could decline significantly in value.

## **FUND MANAGEMENT**

### **Investment Adviser**

Empowered Funds, LLC dba EA Advisers serves as the Funds' investment adviser (the "Adviser"). The Adviser is located at 19 East Eagle Road, Havertown, Pennsylvania 19083 and is wholly-owned by Alpha Architect, LLC. The Adviser is registered with the Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940 and provides investment advisory services to the Funds other exchange-traded funds, and Alpha Architect, LLC, its parent company. The Adviser was founded in October 2013.

The Adviser selects the Funds' sub-adviser and oversees the sub-adviser's management of each Fund. The Adviser is responsible for overseeing the management and business affairs of the Funds, and has discretion to purchase and sell securities in accordance with each Fund's objectives, policies and restrictions. The Adviser continuously reviews, supervises and administers each Fund's investment programs pursuant to the terms of investment advisory agreement (the "Advisory Agreement") between the Trust and the Adviser. The Adviser is entitled to an annual advisory fee based on its average daily net assets for the services and facilities it provides payable at the annual rates set forth in the table below:

<b>Fund</b>	<b>Advisory Fee</b>
Astoria US Small Cap Quality Growth Kings ETF	0.48%
Astoria Dynamic Core US Fixed Income ETF	0.45%

The Adviser (or an affiliate of the Adviser) bears all of the Adviser's own costs associated with providing these advisory services and all expenses of the Funds, except for the fee payment under the Advisory Agreement, payments under the Funds' Rule 12b-1 Distribution and Service Plan (the "Plan"), brokerage expenses, acquired fund fees and expenses (including affiliated funds' fees and expenses), taxes (including tax-related services), interest (including borrowing costs), litigation expenses (including class action-related services) and other non-routine or extraordinary expenses.

The Advisory Agreement for the Funds provides that it may be terminated at any time, without the payment of any penalty, by the Board or, with respect to the Fund, by a majority of the outstanding shares of the Fund, on 60 days' written notice to the Adviser, and by the Adviser upon 60 days' written notice, and that it shall be automatically terminated if it is assigned. The Adviser retains the authority, pursuant to the terms of the investment sub-advisory agreement, to exercise its right to control the overall management of each Fund's assets.

#### **Investment Sub-Advisers**

##### Astoria Portfolio Advisors, LLC

The Adviser has retained Astoria Portfolio Advisors, LLC ("Astoria"), an investment adviser registered with the SEC, to provide sub-advisory services for the Funds. Astoria is organized as a New York limited liability company with its principal office located at 500 7<sup>th</sup> Avenue, 9<sup>th</sup> Floor, New York, New York 10018, and was founded in 2017. Astoria offers investment management services to individual and institutional clients, as well as the Funds, and primarily allocates client assets among various ETFs, and individual debt and equity securities in accordance with their stated investment objectives. Astoria is responsible for determining the investments for the Funds, subject to the overall supervision and oversight of the Adviser and the Board.

Astoria performs its services as a non-discretionary sub-adviser, which means that Astoria is not responsible for selecting brokers or placing each Fund's trades. Rather, Astoria provides trade recommendations to the Adviser and, in turn, the Adviser is responsible for selecting brokers and placing each Fund's trades. It is anticipated that the Adviser will generally adhere to Astoria's recommendations.

For its services, the Adviser pays Astoria a fee, which is calculated daily and paid monthly, at an annual rate based on each Fund's average daily net assets as follows:

<b>Fund</b>	<b>Sub-Advisory Fee</b>
Astoria US Small Cap Quality Growth Kings ETF	0.24%
Astoria Dynamic Core US Fixed Income ETF	0.23%

##### Astor Investment Management, LLC (Astoria Dynamic Core US Fixed Income ETF only)

Astoria has retained Astor Investment Management, LLC ("Astor"), an investment adviser registered with the SEC under the Advisers Act, to provide sub-advisory services to the Astoria Dynamic Core US Fixed Income ETF. Astor has its principal offices located at 111 S Wacker Dr Suite #3950, Chicago, IL 60606. Astor was formed in 2013 and specializes in providing proprietary tactical allocation strategies focused on macroeconomic analysis primarily to separately managed accounts, mutual funds, and unified managed accounts. Subject to the supervision and oversight of Astoria, the Adviser and the Board, and pursuant to a Investment Sub-Sub-Advisory Agreement between Astoria and Astor (the "Astor Sub-Advisory Agreement"), Astor is responsible for researching, analyzing, and recommending securities to be purchased by the Fund in collaboration with Astoria.

Pursuant to the Astor Sub-Advisory Agreement, Astoria pays Astor a fee, which is paid monthly, of 45% of Astoria's net revenue with respect to services provided to the Fund.

#### **Fund Sponsor**

The Adviser has entered into a fund sponsorship agreement with Astoria pursuant to which Astoria is also the sponsor of the Funds ("Fund Sponsor"). Under this arrangement, the Fund Sponsor has agreed to provide financial support to the Funds (as described below) and, in turn, the Adviser has agreed to share with the Fund Sponsor a portion of profits, if any, generated by each

Fund's Advisory Fee (also as described below). Every month, the Advisory Fee, which is a unitary management fee, is calculated and paid to the Adviser.

If the amount of the unitary management fee exceeds each Fund's operating expenses and the Adviser-retained amount, the Adviser pays the net total to the Fund Sponsor. The amount paid to the Fund Sponsor represents both the sub-advisory fee and any remaining profits from the Advisory Fee. During months where there are no profits or the funds are not sufficient to cover the entire sub-advisory fee, the sub-advisory fee is automatically waived.

If the amount of the unitary management fee is less than each Fund's operating expenses and the Adviser-retained amount, Fund Sponsor is obligated to reimburse the Adviser for the shortfall.

The Adviser-retained amount represents an agreed upon fee arrangement between the Adviser and Fund Sponsor. This arrangement calls for the Fund Sponsor to pay the Adviser a fee and reimburse the Adviser for certain Fund operating expenses it paid pursuant to the Advisory Agreement.

## **APPROVAL OF ADVISORY AGREEMENT & INVESTMENT SUB-ADVISORY AGREEMENTS**

A discussion regarding the basis for the Board's approval of the Advisory Agreement and the Sub-Advisory Agreement with respect to the Funds will be available in the Funds' reports filed on Form N-CSR for the fiscal period ended May 31, 2025.

### **Manager of Managers Structure**

The Adviser and the Trust have received an exemptive order (the "Order") from the SEC that allows each Fund to operate in a "manager of managers" structure whereby the Adviser can appoint and replace unaffiliated sub-advisers, and enter into, amend and terminate sub-advisory agreements with such sub-advisers, each subject to Board approval, but without obtaining prior shareholder approval ("Manager of Managers Structure"). Each Fund will, however, inform shareholders of the hiring of any new sub-adviser within 90 days after the hiring, to the extent the Fund is relying on the Order. The Order provides each Fund with greater flexibility and efficiency by preventing the Fund from incurring the expense and delays associated with obtaining shareholder approval of such sub-advisory agreements.

To the extent each Fund relies on the Order, a Fund's use of the Manager of Managers Structure is subject to certain conditions that are set forth in the Order. Under the Manager of Managers Structure, the Adviser has the ultimate responsibility, subject to oversight by the Board, to oversee sub-advisers and recommend their hiring, termination and replacement. The Adviser will also, subject to the review and approval of the Board; set each Fund's overall investment strategy; evaluate, select and recommend sub-advisers to manage all or a portion of each Fund's assets; and implement procedures reasonably designed to ensure that each sub-adviser complies with each Fund's investment goal, policies and restrictions. Subject to review by the Board, the Adviser will allocate and, when appropriate, reallocate each Fund's assets among sub-advisers and monitor and evaluate the sub-advisers' performance.

## **PORTFOLIO MANAGERS**

The portfolio managers are jointly and primarily responsible for various functions related to portfolio management, including, but not limited to, making recommendations (or implementing) with respect to the following: investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of the portfolio management team with more limited responsibilities.

Mr. John Davi is the Founder, CEO, and CIO of Astoria. Prior to founding the Sub-Adviser in 2017, Mr. Davi served as head of Morgan Stanley's institutional ETF content, advising private funds and asset managers on ETF portfolio construction.

Mr. Nicholas Cerbone has served as a Vice President and Quantitative Strategist for Astoria since 2022. In this capacity, Nicholas assists in all aspects of portfolio construction and optimization of Astoria's quantitative stock portfolios and cross-asset ETF models. Mr. Cerbone worked as a Quantitative Strategist and Portfolio Analyst for Astoria from 2019 to 2022. Nicholas is a Summa Cum Laude graduate of Hofstra University with a Bachelor of Science degree in Mathematical Finance. He also achieved the Chartered Financial Analyst (CFA) designation in October of 2022.

John "Jan" Eckstein joined Astor in 2011 and serves as Chief Investment Officer. As Vice Chairperson of the firm's investment committee, Eckstein is responsible for international global macro strategies. In 1995, she founded Cornerstone Quantitative Investment Group, a global macro hedge fund with peak assets of \$600 million. Prior to Cornerstone, Eckstein was a researcher for Luck Trading Company, a commodity trading adviser, is a co-author of *Commodity Investing* (John Wiley & Sons, 2008) and is a frequent speaker at industry events. She holds a B.S. from Brown University and a Masters in Public Administration (MPA – International Economic Policy) from Columbia University.

The SAI provides additional information about the portfolio managers, including other accounts each manages, their ownership in each Fund, and compensation.

## OTHER SERVICE PROVIDERS

Quasar Distributors, LLC (“Distributor”) serves as the distributor of Creation Units (defined above) for the Funds on an agency basis. The Distributor does not maintain a secondary market in Shares.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, is the administrator, fund accountant, and transfer agent for the Funds.

U.S. Bank National Association is the custodian for the Funds.

Practus, LLP, 11300 Tomahawk Creek Parkway, Suite 310, Leawood, Kansas 66211, serves as legal counsel to the Trust.

Tait, Weller & Baker LLP, 50 South 16th Street, Suite 2900, Philadelphia, Pennsylvania 19102, serves as each Fund’s independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of each Fund.

## THE EXCHANGE

Shares are not sponsored, endorsed or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in, the determination of the timing of, prices of, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing or trading of Shares. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

## BUYING AND SELLING FUND SHARES

Each Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. Creation Units are generally issued and redeemed only in-kind for securities although a portion may be in cash.

Shares will trade on the secondary market, however, which is where most retail investors will buy and sell Shares. It is expected that only a limited number of institutional investors, called Authorized Participants or “APs,” will purchase and redeem Shares directly from the Funds. APs may acquire Shares directly from the Funds, and APs may tender their Shares for redemption directly to the Funds, at NAV per Share only in large blocks, or Creation Units. Purchases and redemptions directly with each Fund must follow the Fund’s procedures, which are described in the SAI.

**Except when aggregated in Creation Units, Shares are not redeemable with each Fund.**

## BUYING AND SELLING SHARES ON THE SECONDARY MARKET

Most investors will buy and sell Shares in secondary market transactions through brokers and, therefore, must have a brokerage account to buy and sell Shares. Shares can be bought or sold through your broker throughout the trading day like shares of any publicly traded issuer. The Trust does not impose any redemption fees or restrictions on redemptions of Shares in the secondary market. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered prices in the secondary market for Shares. The price at which you buy or sell Shares (*i.e.*, the market price) may be more or less than the NAV of the Shares. Unless imposed by your broker, there is no minimum dollar amount you must invest in the Funds and no minimum number of Shares you must buy.

Shares of each Fund are listed on the Exchange under the following symbol:

<b>Fund</b>	<b>Trading Symbol</b>
Astoria US Small Cap Quality Growth Kings ETF	SROE
Astoria Dynamic Core US Fixed Income ETF	AGGA

The Exchange is generally open Monday through Friday and is closed for weekends and the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Washington’s Birthday, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

For information about buying and selling Shares on the Exchange or in the secondary markets, please contact your broker or dealer.

**Book Entry.** Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”), or its nominee, will be the registered owner of all outstanding Shares and is recognized as the owner of all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a

registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely on the procedures of DTC and its participants. These procedures are the same as those that apply to any stocks that you hold in book entry or “street name” through your brokerage account. Your account information will be maintained by your broker, which will provide you with account statements, confirmations of your purchases and sales of Shares, and tax information. Your broker also will be responsible for distributing income dividends and capital gain distributions and for ensuring that you receive shareholder reports and other communications from the Funds.

**Share Trading Prices.** The trading prices of Shares may differ from the applicable Fund’s daily NAV and can be affected by market forces of supply and demand for Shares, the prices of the applicable Fund’s portfolio securities, economic conditions and other factors.

The Exchange through the facilities of the Consolidated Tape Association or another market information provider intends to disseminate the approximate value of each Fund’s portfolio every fifteen seconds during regular U.S. trading hours. This approximate value should not be viewed as a “real-time” update of the NAV of the fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day. The quotations for certain investments may not be updated during U.S. trading hours if such holdings do not trade in the U.S., except such quotations may be updated to reflect currency fluctuations. Each Fund is not involved in, or responsible for, the calculation or dissemination of the approximate values and makes no warranty as to the accuracy of these values.

**Continuous Offering.** The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Funds on an ongoing basis, a “distribution,” as such term is used in the Securities Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirements and liability provisions of the Securities Act. For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the Investment Company Act of 1940, as amended (the “Investment Company Act”). As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallocation within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

#### **ACTIVE INVESTORS AND MARKET TIMING**

The Board has evaluated the risks of market timing activities by the Funds’ shareholders. The Board noted that Shares can be purchased and redeemed directly from the Funds only in Creation Units by APs and that the vast majority of trading in Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Funds, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in each Fund’s trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Funds, to the extent effected in-kind (*i.e.*, for securities), the Board noted that those trades do not cause the harmful effects (as previously noted) that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution to the Funds and increased transaction costs, which could negatively impact each Fund’s ability to achieve its investment objective, although in certain circumstances (*e.g.*, in conjunction with a reallocation of each Fund’s investments), such trades may benefit Fund shareholders by increasing the tax efficiency of the Funds. The Board also noted that direct trading by APs is critical to ensuring that Shares trade at or close to NAV. In addition, the Funds will impose transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Funds in effecting trades. Given this structure, the Board determined that it is not necessary to adopt policies and procedures to detect and deter market timing of Shares.

#### **DISTRIBUTION AND SERVICE PLAN**

Each Fund has adopted the Plan pursuant to Rule 12b-1 under the Investment Company Act. Under the Plan, each Fund may be authorized to pay distribution fees of up to 0.25% of its average daily net assets each year to the Distributor and other firms that

provide distribution and shareholder services (“Service Providers”). As of the date of this Prospectus, the maximum amount payable under the Plan is set at 0% until further action by the Board. In the event 12b-1 fees are charged, over time they would increase the cost of an investment in the Funds because they would be paid on an ongoing basis.

## **NET ASSET VALUE**

The NAV of Shares is calculated each business day as of the close of regular trading on the New York Stock Exchange (“NYSE”), generally 4:00 p.m., Eastern time.

Each Fund calculates its NAV per Share by:

- Taking the current market value of its total assets,
- Subtracting any liabilities, and
- Dividing that amount by the total number of Shares owned by shareholders.

If you buy or sell Shares on the secondary market, you will pay or receive the market price, which may be higher or lower than NAV. Your transaction will be priced at NAV only if you purchase or redeem your Shares in Creation Units.

Because securities listed on foreign exchanges may trade on weekends or other days when each Fund does not price its Shares, the NAV of the Fund, to the extent it may hold foreign securities, may change on days when shareholders will not be able to purchase or sell Shares. In particular, where all or a portion of each Fund’s underlying securities trade in a market that is closed when the market in which the Fund’s shares are listed and trading in that market is open, there may be changes between the last quote from its closed foreign market and the value of such security during the Fund’s domestic trading day. In addition, please note that this in turn could lead to differences between the market price of each Fund’s shares and the underlying value of those shares.

Equity securities that are traded on a national securities exchange, except those listed on the NASDAQ Global Market<sup>®</sup> (“NASDAQ”) are valued at the last reported sale price on the exchange on which the security is principally traded. Securities traded on NASDAQ will be valued at the NASDAQ Official Closing Price (“NOCP”). If, on a particular day, an exchange-traded or NASDAQ security does not trade, then the most recent quoted bid for exchange traded or the mean between the most recent quoted bid and ask price for NASDAQ securities will be used. Equity securities that are not traded on a listed exchange are generally valued at the last sale price in the over-the-counter market. If a nonexchange traded security does not trade on a particular day, then the mean between the last quoted closing bid and asked price will be used.

The value of assets denominated in foreign currencies is converted into U.S. dollars using exchange rates deemed appropriate by the Funds.

Redeemable securities issued by open-end investment companies are valued at the investment company’s applicable net asset value, with the exception of exchange-traded open-end investment companies which are priced as equity securities.

If a market price is not readily available or is deemed not to reflect market value, the Funds will determine the price of the security held by the Fund based on a determination of the security’s fair value pursuant to policies and procedures approved by the Board.

To the extent each Fund holds securities that may trade infrequently, fair valuation may be used more frequently. Fair valuation may have the effect of reducing stale pricing arbitrage opportunities presented by the pricing of Shares. However, when each Fund uses fair valuation to price securities, it may value those securities higher or lower than another fund would have priced the security. Also, the use of fair valuation may cause the Shares’ NAV performance to diverge from the Shares’ market price and from the performance of various benchmarks used to compare each Fund’s performance because benchmarks generally do not use fair valuation techniques. Because of the judgment involved in fair valuation decisions, there can be no assurance that the value ascribed to a particular security is accurate.

## **FUND WEBSITE AND DISCLOSURE OF PORTFOLIO HOLDINGS**

The Trust maintains a website for the Funds at <https://astoriaadvisorsetfs.com>. Among other things, the website includes this Prospectus and the SAI, and will include the Funds’ annual and semi-annual reports to shareholders, financial information, holdings, and proxy information. The website shows each Fund’s daily NAV per share, market price, and premium or discount, each as of the prior business day. The website also shows the extent and frequency of each Fund’s premiums and discounts. Further, the website includes each Fund’s median bid-ask spread over the most recent thirty calendar days.

Each day a Fund is open for business, the Trust publicly disseminates each Fund’s full portfolio holdings as of the close of the previous day through its website at <https://astoriaadvisorsetfs.com>. A description of the Trust’s policies and procedures with respect to the disclosure of a Fund’s portfolio holdings is available in the SAI.

## **INVESTMENTS BY OTHER INVESTMENT COMPANIES**

For purposes of the Investment Company Act, Shares are issued by a registered investment company and purchases of such Shares by registered investment companies and companies relying on Section 3(c)(1) or 3(c)(7) of the Investment Company Act are

subject to the restrictions set forth in Section 12(d)(1) of the Investment Company Act, except as permitted by Rule 6c-11, Rule 12d1-4, or an exemptive order of the SEC.

## **DIVIDENDS, DISTRIBUTIONS, AND TAXES**

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

### **Dividends and Distributions**

*Dividends and Distributions.* Each Fund intends to elect and intends to qualify each year as a regulated investment company under the Internal Revenue Code of 1986, as amended. As a regulated investment company, a Fund generally pays no U.S. federal income tax on the income and gains it distributes to you. The Astoria US Small Cap Quality Growth Kings ETF expects to declare and to distribute its net investment income, if any, to shareholders as dividends quarterly and the Astoria Dynamic Core US Fixed Income ETF expects to declare and distribute dividends monthly. Each Fund will distribute net realized capital gains, if any, at least annually. A Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate U.S. federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee a Fund will pay either an income dividend or a capital gains distribution. Distributions may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

*Avoid "Buying a Dividend."* At the time you purchase Shares of a Fund, the Fund's NAV may reflect undistributed income, undistributed capital gains, or net unrealized appreciation in value of portfolio securities held by the Fund. For taxable investors, a subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. Buying Shares in a Fund just before it declares an income dividend or capital gains distribution is sometimes known as "buying a dividend."

### **Taxes**

*Tax Considerations.* Each Fund expects, based on its investment objective and strategies, that its distributions, if any, will be taxable as ordinary income, capital gains, or some combination of both. This is true whether you reinvest your distributions in additional Shares or receive them in cash. For U.S. federal income tax purposes, Fund distributions of short-term capital gains are taxable to you as ordinary income. Fund distributions of long-term capital gains are taxable to you as long-term capital gain no matter how long you have owned your Shares. A portion of income dividends reported by a Fund may be qualified dividend income eligible for taxation by certain shareholders at long-term capital gain rates provided certain holding period requirements are met.

*Taxes on Sales of Shares.* A sale or exchange of Shares is a taxable event and, accordingly, a capital gain or loss will generally be recognized. Currently, any capital gain or loss realized upon a sale of Shares generally is treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses may be limited.

*Medicare Tax.* An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from a Fund and net gains from redemptions or other taxable dispositions of Shares) of U.S. individuals, estates, and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds a threshold amount. This Medicare tax, if applicable, is reported by you on, and paid with, your U.S. federal income tax return.

*Backup Withholding.* By law, if you do not provide a Fund with your proper taxpayer identification number and certain required certifications, you may be subject to backup withholding on any distributions of income, capital gains or proceeds from the sale of your Shares. A Fund also must backup withhold if the Internal Revenue Service ("IRS") instructs it to do so. When backup withholding is required, the amount will be 24% of any distributions or proceeds paid.

*State and Local Taxes.* Fund distributions and gains from the sale or exchange of your Shares generally are subject to applicable state and local taxes.

*Taxes on Purchase and Redemption of Creation Units.* An AP who exchanges equity securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the

time of purchase and the exchanger's aggregate basis in the securities surrendered and the cash amount paid. A person who exchanges Creation Units for equity securities generally will recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the aggregate market value of the securities received and the cash amount received. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether the wash sale rules apply and when a loss might not be deductible.

Under current U.S. federal tax laws, any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

If a Fund redeems Creation Units in cash, it may recognize more capital gains than it will if it redeems Creation Units in-kind.

*Foreign Tax Credits.* If the Fund qualifies to pass through to you the tax benefits from foreign taxes it pays on its investments, and elects to do so, then any foreign taxes it pays on these investments may be passed through to you as a foreign tax credit.

*Non-U.S. Investors.* Non-U.S. investors may be subject to U.S. federal withholding tax at a 30% or lower treaty rate and are subject to special U.S. federal tax certification requirements to avoid backup withholding and claim any treaty benefits. An exemption from U.S. federal withholding tax is provided for capital gain dividends paid by a Fund from long-term capital gains, if any. However, interest-related dividends paid by a Fund from its qualified net interest income from U.S. sources and short-term capital gain dividends may be exempt from U.S. withholding provided the Fund makes certain designations and other requirements are met. Furthermore, notwithstanding such exemptions from U.S. federal withholding at the source, any such dividends and distributions of income and capital gains will be subject to U.S. federal backup withholding at a rate of 24% if you fail to properly certify that you are not a U.S. person. In addition, U.S. estate tax may apply to Shares of a Fund.

*Other Reporting and Withholding Requirements.* Under the Foreign Account Tax Compliance Act (FATCA), each Fund will be required to withhold a 30% tax on (i) income dividends paid by the Fund, and (ii) possibly in the future, certain capital gain distributions and the proceeds arising from the sale of Shares paid by the Fund, to certain foreign entities, referred to as foreign financial institutions or non-financial foreign entities, that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. A Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of a Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

*Possible Tax Law Changes.* At the time that this prospectus is being prepared, various administrative and legislative changes to the U.S. federal tax laws are under consideration, but it is not possible at this time to determine whether any of these changes will be made or what the changes might entail.

**This discussion of "Dividends, Distributions and Taxes" is not intended or written to be used as tax advice. Because everyone's tax situation is unique, you should consult your tax professional about U.S. federal, state, local or foreign tax consequences before making an investment in a Fund.**

## **FINANCIAL HIGHLIGHTS**

Each Fund is newly organized and therefore has not yet had any operations as of the date of this Prospectus and does not have financial highlights to present at this time.

## **ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS**

Additional information about each Fund is in its annual and semi-annual reports to shareholders and in Form N-CSR. The annual report explains the market conditions and investment strategies affecting each Fund's performance during the last fiscal year. In Form N-CSR, you will find the Fund's annual and semi-annual financial statements.

## **STATEMENT OF ADDITIONAL INFORMATION**

The SAI dated April 25, 2025, which contains more details about the Funds, is incorporated by reference in its entirety into this Prospectus, which means that it is legally part of this Prospectus.

To receive a free copy of the latest annual or semi-annual report, or the SAI, or to request additional information about the Funds, please contact us as follows:
