CITY DIFFERENT INVESTMENTS SMID CAP CORE EQUITY ETF

Fund Summary

INVESTMENT OBJECTIVE

The City Different Investments SMID Cap Core Equity ETF (the “Fund”) seeks to achieve capital appreciation.

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table or example.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.75%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ¹	0.00%
Total Annual Fund Operating Expenses	0.75%

¹ Other Expenses are estimated for the current fiscal year.

EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then hold or sell all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year:	Three Years:
\$77	\$240

PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. As of the date of this Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange traded fund (“ETF”) that seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of the Fund’s net assets (plus the amount of any borrowings for investment purposes) in equity securities of small- and mid-capitalization companies (“SMID Cap Companies”), defined as companies with a market capitalization between \$100 million to \$20 billion. The Fund defines “equity securities” to mean common stock, depositary receipts (e.g., American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”)), equity interests in real estate investment trusts (“REITs”) and master limited partnerships (“MLPs”). The Fund will invest in U.S. securities but may invest up to 25% of the Fund’s assets in foreign securities, including emerging markets.

The Fund’s sub-adviser, City Different Holdings LP, dba City Different Investments, (the “Sub-Adviser”) seeks to build a portfolio of stocks that it believes, through fundamental research, are overlooked by other investors and which have good risk/reward metrics. In determining which stocks exhibit good risk/reward metrics, the Sub-Adviser analyzes publicly available and third-party data and implements its internal, proprietary research process. The Sub-Adviser then seeks to construct a portfolio that it believes will provide the potential to outperform in any market environment. The Sub-Adviser selects SMID Cap Companies that are in different stages of their business cycle, including:

- Emerging businesses that tend to be early in their lifecycle with potential for growth.
- Established businesses that tend to have a strong market position and margins with growth opportunities ahead of them.
- Mature businesses that are later in their lifecycle, and which tend to be in cyclical industries with less market share of industry growth opportunities.

The Sub-Adviser selects individual companies to purchase or sell based primarily on internal research and fundamental analyses that leverages insights from diverse sources, including internal and external research.

The Fund will typically hold between 20-35 positions and no individual position will exceed more than 10% of the Fund's assets at the time of purchase.

The Fund is classified as "non-diversified" under the Investment Company Act of 1940, as amended, which means the Fund may take larger positions in a fewer number of issuers.

The Sub-Adviser may sell a security for a number of reasons including, but not limited to, if a determination is made that the security no longer meets its investment criteria or if a new security is judged more attractive than a current holding.

The Fund will be rebalanced monthly or more frequently in the sole discretion of the Sub-Adviser.

PRINCIPAL INVESTMENT RISKS

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. More complete risk descriptions are set forth below under the heading "*Additional Information About the Fund's Principal Investment Risks.*"

Small- and Mid-Capitalization Company Risk. Investing in securities of SMID Cap Companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies. SMID Cap Companies and the industries in which they focus may still be evolving and, as a result, they may be more sensitive to changing market conditions. SMID Cap Companies often have less predictable earnings, more limited product lines, markets, distribution channels and financial resources, and the management of such companies may be dependent upon one or a few people.

Risk of Investing in the U.S. Certain changes in the U.S. economy, such as when the U.S. economy weakens or when its financial markets decline, may have an adverse effect on the securities to which the Fund has exposure.

Investment Risk. When you sell your Shares, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security. Geopolitical and other risks, including war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises, and environmental disasters such as earthquakes, fire, and floods, may add to instability in world economies and volatility in markets generally. Changes in trade policies and international trade agreements could affect the economies of many countries in unpredictable ways. The value of a security may also decline due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Non-Diversification Risk. Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

Foreign Investment Risk. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Investments in or exposures to foreign securities are subject to special risks, including risks associated with foreign securities generally. Those special risks may arise due to differences in information available about issuers of securities and investor protection standards applicable in other jurisdictions; capital controls risks, including the risk of a foreign jurisdiction imposing restrictions on the ability to repatriate or transfer currency or other assets; currency risks; political, diplomatic and economic risks; regulatory risks; and foreign market and trading risks, including the costs of trading and risks of settlement in foreign jurisdictions.

Emerging Markets Risk. Many emerging market countries have a history of, and continue to experience serious, and potentially continuing, economic and political problems. Stock markets in many emerging market countries are relatively small, expensive to trade in and generally have higher risks than those in developed markets. Securities in emerging markets also may be less liquid than those in developed markets and foreigners are often limited in their ability to invest in, and withdraw assets from, these markets. Additional restrictions may be imposed under other conditions.

Depository Receipt Risk. The risks of investments in depository receipts, including ADRs and GDRs, are substantially similar to Foreign Investment Risk. In addition, depository receipts may not track the price of the underlying foreign securities, and their value may change materially at times when the U.S. markets are not open for trading. In addition, the underlying issuers of certain depository receipts, particularly unsponsored or unregistered depository receipts, are under no obligation to distribute shareholder

communications to the holders of such receipts, or to pass through any voting rights with respect to the deposited securities. Therefore, the Sub-Adviser will not be able to vote on any matters with respect to these instruments.

Currency Risk. Currency exchange rates may fluctuate significantly over short periods of time and can be unpredictably affected by political developments or government intervention. Changes in currency exchange rates may directly affect the U.S. dollar value of the Fund when it has exposure to global regions and foreign securities.

ETF Risks.

- *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Premium-Discount Risk.* The Shares may trade above or below their net asset value (“NAV”). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on The Nasdaq Stock Market LLC (the “Exchange”) or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares. In addition, you may incur the cost of the “spread,” that is, any difference between the bid price and the ask price of the Shares. In addition, with respect to the City Different Investments Global Equity ETF because securities held by the Fund may trade on foreign exchanges that are closed when its primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.
- *Cost of Trading Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares.
- *Trading Risk.* Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be less liquid than Shares, potentially causing the market price of Shares to deviate from its NAV. The spread varies over time for Shares of the Fund based on the Fund’s trading volume and market liquidity and is generally lower if the Fund has high trading volume and market liquidity, and higher if the Fund has little trading volume and market liquidity (which is often the case for funds that are newly launched or small in size).

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Adviser’s, Sub-Adviser’s, or portfolio managers’ success or failure to implement investment strategies for the Fund. The success of the Fund’s investment program depends largely on the investment techniques and risk analyses applied by the Adviser, Sub-Adviser, and the portfolio managers and the skill of the Adviser, Sub-Adviser, and/or portfolio managers in evaluating, selecting, and monitoring the Fund’s assets. The Fund could experience losses (realized and unrealized) if the judgment of the Adviser, Sub-Adviser, or portfolio managers about markets or sectors or the attractiveness of particular investments made for the Fund’s portfolio prove to be incorrect. It is possible the investment techniques and risk analyses employed on behalf of the Fund will not produce the desired results.

New Sub-Adviser Risk. Although the Sub-Adviser’s principals and the Fund’s portfolio managers have experience managing investments in the past, the Sub-Adviser has no experience managing investments for an ETF, which may limit the Sub-Adviser’s effectiveness.

New Fund Risk. The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

REITs Risk. Equity REITs may be affected by changes in the value of the underlying properties owned by the trusts. Mortgage REITs are exposed to risks associated with changes in interest rates, changes in credit spreads, and declines in real estate values. Debt investments are also subject to loss in value due to high or sustained inflation because the debt could be paid back in significantly depreciated currency. Further, REITs are dependent upon specialized management skills and cash flows, and may have investments in relatively few properties, or in a small geographic area or a single property type. Failure of a company to qualify as a REIT under federal tax law may have adverse consequences to the Fund. In addition, REITs have their own expenses, and the Fund will bear a proportionate share of those expenses. The value of a REIT may be affected by changes in interest rates.

MLP Risk. Investment in securities of an MLP involves risks that differ from investments in common stock, including risks related to limited control and limited rights to vote on matters affecting the MLP, risks related to potential conflicts of interest

between the MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's right to require unit-holders to sell their common units at an undesirable time or price. Certain MLP securities may trade in lower volumes due to their smaller capitalizations. Accordingly, those MLPs may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price. MLPs are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns.

PERFORMANCE

Performance information is not provided below because the Fund has not yet been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund's average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Updated performance information will be available at <https://cdifunds.com/>.

INVESTMENT ADVISER & INVESTMENT SUB-ADVISER

Investment Adviser: Empowered Funds, LLC dba EA Advisers (the "Adviser")
Investment Sub-Adviser: City Different Holdings LP, dba City Different Investments

PORTFOLIO MANAGERS

Mr. Rob MacDonald and Mr. Connor Browne are the portfolio managers and the persons primarily responsible for the day-to-day management of the Fund. Mr. MacDonald and Mr. Browne have served as portfolio managers of the Fund since its inception.

PURCHASE AND SALE OF SHARES

Individual Shares are listed on a national securities exchange and may only be purchased and sold in the secondary market through a broker-dealer at a market price. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a "premium") or less than NAV (at a "discount"). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying and selling Shares in the secondary market (the "bid/ask spread").

TAX INFORMATION

The Fund's distributions generally are taxable to you as ordinary income, capital gain, or some combination of both, unless your investment is made through an Individual Retirement Account ("IRA") or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your own tax advisor about your specific tax situation.

PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

CITY DIFFERENT INVESTMENTS GLOBAL EQUITY ETF

Fund Summary

INVESTMENT OBJECTIVE

The City Different Investments Global Equity ETF (the “Fund”) seeks to achieve capital appreciation.

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table or example.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.75%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ¹	0.00%
Total Annual Fund Operating Expenses	0.75%

¹ Other Expenses are estimated for the current fiscal year.

EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then hold or sell all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year:	Three Years:
\$77	\$240

PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. As of the date of this Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange traded fund (“ETF”) that seeks to achieve its investment objective by investing under normal circumstances, at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in equity securities. The Fund defines “equity securities” to mean common stock, depositary receipts (e.g., American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”)), equity interests in real estate investment trusts (“REITs”) and master limited partnerships (“MLPs”). The Fund will invest in U.S. and foreign securities, including emerging markets, of companies with a market capitalization of greater than \$500 million. The Fund will invest, under normal market conditions, in at least three different countries, and invest at least 30% of its assets in foreign securities, including depositary receipts, outside the United States.

The Fund’s sub-adviser, City Different Holdings LP, dba City Different Investments, (the “Sub-Adviser”) seeks to build a portfolio of stocks that it believes, through fundamental research, are overlooked by other investors and which have good risk/reward metrics. The Sub-Adviser selects individual companies to purchase or sell based primarily on internal research and fundamental analyses that leverages insights from diverse sources, including internal and external research.

The Sub-Adviser seeks to invest the Fund’s assets in companies that have the following attributes:

Business Quality	Companies that have enduring competitive advantages, market leadership and strong balance sheets that allow such companies to perform well through multiple business cycles.
Attractive Valuations	Companies that the Sub-Adviser believes to be undervalued with unrecognized potential, supported by the Sub-Adviser's fundamental analysis that determines that when fairly valued, the business is worth much more than what the market is currently attributing to it.
Paths to Success	Companies for which the Sub-Adviser has identified multiple scenarios and specific catalysts, for example the change in the capital allocation policies of a company (such as share repurchases), that are likely to occur within the Sub-Adviser's investment time horizon for a particular investment.

The Fund will typically hold between 20-30 positions.

The Fund is classified as "non-diversified" under the Investment Company Act of 1940, as amended, which means the Fund may take larger positions in a fewer number of issuers.

The Sub-Adviser may sell a security for a number of reasons including, but not limited to, if a determination is made that the security no longer meets its investment criteria or if a new security is judged more attractive than a current holding.

The Fund will be rebalanced monthly or more frequently in the sole discretion of the Sub-Adviser.

PRINCIPAL INVESTMENT RISKS

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. More complete risk descriptions are set forth below under the heading "Additional Information About the Fund's Principal Investment Risks."

Small- and Mid-Capitalization Company Risk. Investing in securities of small- and mid-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies. Small- and mid-capitalization companies and the industries in which they focus may still be evolving and, as a result, they may be more sensitive to changing market conditions. Small- and mid-capitalization companies often have less predictable earnings, more limited product lines, markets, distribution channels and financial resources, and the management of such companies may be dependent upon one or few people.

Risk of Investing in the U.S. Certain changes in the U.S. economy, such as when the U.S. economy weakens or when its financial markets decline, may have an adverse effect on the securities to which the Fund has exposure.

Foreign Investment Risk. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Investments in or exposures to foreign securities are subject to special risks, including risks associated with foreign securities generally. Those special risks may arise due to differences in information available about issuers of securities and investor protection standards applicable in other jurisdictions; capital controls risks, including the risk of a foreign jurisdiction imposing restrictions on the ability to repatriate or transfer currency or other assets; currency risks; political, diplomatic and economic risks; regulatory risks; and foreign market and trading risks, including the costs of trading and risks of settlement in foreign jurisdictions.

Depository Receipts. Depository receipts, including ADRs and GDRs, are generally subject to the same risks as the foreign securities that they evidence or into which they may be converted. In addition, the underlying issuers of certain depository receipts, particularly unsponsored or unregistered depository receipts, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities. Depository receipts that are not sponsored by the issuer may be less liquid and there may be less readily available public information about the issuer.

Currency Risk. Currency exchange rates may fluctuate significantly over short periods of time and can be unpredictably affected by political developments or government intervention. Changes in currency exchange rates may directly affect the U.S. dollar value of the Fund of when it has exposure to global regions and foreign securities.

Emerging Markets Risk. Many emerging market countries have a history of, and continue to experience serious, and potentially continuing, economic and political problems. Stock markets in many emerging market countries are relatively small, expensive to trade in and generally have higher risks than those in developed markets. Securities in emerging markets also may be less liquid than those in developed markets and foreigners are often limited in their ability to invest in, and withdraw assets from, these markets. Additional restrictions may be imposed under other conditions.

Investment Risk. When you sell your Shares, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a

security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security. Geopolitical and other risks, including war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises, and environmental disasters such as earthquakes, fire, and floods, may add to instability in world economies and volatility in markets generally. Changes in trade policies and international trade agreements could affect the economies of many countries in unpredictable ways. The value of a security may also decline due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Large-Capitalization Companies Risk. Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years. Larger, more established companies may be slow to respond to challenges and may grow more slowly than smaller companies.

Non-Diversification Risk. Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

ETF Risks.

- *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Premium-Discount Risk.* The Shares may trade above or below their net asset value (“NAV”). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on The Nasdaq Stock Market LLC (the “Exchange”) or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares. In addition, you may incur the cost of the “spread,” that is, any difference between the bid price and the ask price of the Shares. In addition, because securities held by the Fund may trade on foreign exchanges that are closed when its primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.
- *Cost of Trading Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares.
- *Trading Risk.* Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be less liquid than Shares, potentially causing the market price of Shares to deviate from its NAV. The spread varies over time for Shares of the Fund based on the Fund’s trading volume and market liquidity and is generally lower if the Fund has high trading volume and market liquidity, and higher if the Fund has little trading volume and market liquidity (which is often the case for funds that are newly launched or small in size).

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Adviser’s, Sub-Adviser’s, or portfolio managers’ success or failure to implement investment strategies for the Fund. The success of the Fund’s investment program depends largely on the investment techniques and risk analyses applied by the Adviser, Sub-Adviser, and the portfolio managers and the skill of the Adviser, Sub-Adviser, and/or portfolio managers in evaluating, selecting, and monitoring the Fund’s assets. The Fund could experience losses (realized and unrealized) if the judgment of the Adviser, Sub-Adviser, or portfolio managers about markets or sectors or the attractiveness of particular investments made for the Fund’s portfolio prove to be incorrect. It is possible the investment techniques and risk analyses employed on behalf of the Fund will not produce the desired results.

New Sub-Adviser Risk. Although the Sub-Adviser’s principals and the Fund’s portfolio managers have experience managing investments in the past, the Sub-Adviser has no experience managing investments for an ETF, which may limit the Sub-Adviser’s effectiveness.

New Fund Risk. The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

REITs Risk. Equity REITs may be affected by changes in the value of the underlying properties owned by the trusts. Mortgage REITs are exposed to risks associated with changes in interest rates, changes in credit spreads, and declines in real estate values. Debt investments are also subject to loss in value due to high or sustained inflation because the debt could be paid back in significantly depreciated currency. Further, REITs are dependent upon specialized management skills and cash flows, and may have investments in relatively few properties, or in a small geographic area or a single property type. Failure of a company to qualify as a REIT under federal tax law may have adverse consequences to the Fund. In addition, REITs have their own expenses, and the Fund will bear a proportionate share of those expenses. The value of a REIT may be affected by changes in interest rates.

MLP Risk. Investment in securities of an MLP involves risks that differ from investments in common stock, including risks related to limited control and limited rights to vote on matters affecting the MLP, risks related to potential conflicts of interest between the MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's right to require unit-holders to sell their common units at an undesirable time or price. Certain MLP securities may trade in lower volumes due to their smaller capitalizations. Accordingly, those MLPs may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price. MLPs are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns.

PERFORMANCE

Performance information is not provided below because the Fund has not yet been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund's average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Updated performance information will be available at <https://cdifunds.com/>.

INVESTMENT ADVISER & INVESTMENT SUB-ADVISER

Investment Adviser: Empowered Funds, LLC dba EA Advisers (the "Adviser")

Investment Sub-Adviser: City Different Holdings LP, dba City Different Investments (the "Sub-Adviser")

PORTFOLIO MANAGER

Vinson Walden is the portfolio manager and the person primarily responsible for the day-to-day management of the Fund. Mr. Walden has served as portfolio manager of the Fund since its inception.

PURCHASE AND SALE OF SHARES

Individual Shares are listed on a national securities exchange and may only be purchased and sold in the secondary market through a broker-dealer at a market price. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a "premium") or less than NAV (at a "discount"). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying and selling Shares in the secondary market (the "bid/ask spread").

TAX INFORMATION

The Fund's distributions generally are taxable to you as ordinary income, capital gain, or some combination of both, unless your investment is made through an Individual Retirement Account ("IRA") or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your own tax advisor about your specific tax situation.

PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUNDS' INVESTMENT OBJECTIVES AND PRINCIPAL INVESTMENT STRATEGIES

Each Fund's investment objective is a non-fundamental investment policy and may be changed without a vote of shareholders upon prior written notice to shareholders.

Each Fund's 80% policy is non-fundamental and can be changed without shareholder approval. Fund shareholders would be given at least 60 days' notice prior to any such change.

As of the date of this Prospectus, the Sub-Adviser has designated the following countries as emerging: Brazil, Chile, China, Colombia, the Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Kuwait, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Saudi Arabia, South Africa, South Korea, Taiwan, Thailand, Turkey, and the United Arab Emirates. In determining a country to be an emerging country, the Sub-Adviser may consider various factors, including but not limited to its economic development, its integration into the global financial system, and the classifications of independent organizations, such as the International Monetary Fund. To determine if a company is related to an emerging market country, the Sub-Adviser will consider various factors, including its headquarters location, principal operations, revenue sources, principal trading market, and legal organization. The countries designated as emerging markets will change from time to time. In addition, the countries where a Fund holds investments will change from time to time.

Temporary Defensive Positions. From time to time, each Fund may take temporary defensive positions that are inconsistent with its principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions. In those instances, a Fund may hold up to 100% of its assets in cash; short-term U.S. government securities and government agency securities; investment grade money market instruments; money market mutual funds; investment grade fixed income securities; repurchase agreements; commercial paper; cash equivalents; and exchange-traded investment vehicles that principally invest in the foregoing instruments. As a result of engaging in these temporary measures, a Fund may not achieve its investment objective.

ADDITIONAL INFORMATION ABOUT THE FUNDS' PRINCIPAL INVESTMENT RISKS

The following information is in addition to, and should be read along with, the description of each Fund's principal investment risks in the sections titled "Fund Summary—Principal Investment Risks" above. The risks listed below apply to each Fund unless otherwise stated.

Currency Risk. Currency exchange rates may fluctuate significantly over short periods of time and can be unpredictably affected by political developments or government intervention. Changes in currency exchange rates may directly affect the U.S. dollar value of the Fund when it has exposure to global regions and foreign securities.

Depository Receipt Risk. A Fund's investments in foreign companies may be in the form of depository receipts, including ADRs, European Depositary Receipts ("EDRs"), and GDRs. ADRs, EDRs, and GDRs are generally subject to the risks of investing directly in foreign securities and, in some cases, there may be less information available about the underlying issuers than would be the case with a direct investment in the foreign issuer. ADRs are U.S. dollar-denominated receipts representing shares of foreign-based corporations. GDRs are similar to ADRs but are shares of foreign-based corporations generally issued by international banks in one or more markets around the world. Investment in ADRs and GDRs may be more or less liquid than the underlying shares in their primary trading market and GDRs may be more volatile. Depository receipts may be "sponsored" or "unsponsored" and may be unregistered and unlisted. Sponsored depository receipts are established jointly by a depository and the underlying issuer, whereas unsponsored depository receipts may be established by a depository without participation by the underlying issuer. Holders of an unsponsored depository receipt generally bear all the costs associated with establishing the unsponsored depository receipt. In addition, the issuers of the securities underlying unsponsored depository receipts are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding those issuers and there may not be a correlation between that information and the market value of the depository receipts. In general, ADRs must be sponsored, but a Fund may invest in unsponsored ADRs under various limited circumstances. A Fund's investments may also include ADRs and GDRs that are not purchased in the public markets and are restricted securities that can be offered and sold only to "qualified institutional buyers" under Rule 144A of the Securities Act of 1933, as amended (the "Securities Act"). The Adviser will determine the liquidity of these investments pursuant to guidelines established by the Board. If a particular investment in ADRs or GDRs is deemed illiquid, that investment will be included within a Fund's limitation on investment in illiquid securities. Moreover, if adverse market conditions were to develop during the period between a Fund's decision to sell these types of ADRs or GDRs and the point at which a Fund is permitted or able to sell the security, a Fund might obtain a price less favorable than the price that prevailed when it decided to sell.

Emerging Markets Risk. Many emerging market countries have a history of, and continue to experience serious, and potentially continuing, economic and political problems. Similar to foreign issuers, emerging market issuers may not be subject to uniform accounting, auditing and financial reporting standards and there may be less publicly available financial and other information about such issuers, comparable to U.S. issuers. Stock markets in many emerging market countries are relatively small, expensive to trade in and generally have higher risks than those in developed markets. Securities in emerging markets also may be less liquid

than those in developed markets and foreigners are often limited in their ability to invest in, and withdraw assets from, these markets. Additional restrictions may be imposed under other conditions.

Investments in companies that derive revenues from emerging markets are subject to a greater risk of loss than investments in companies that derive revenues from more developed markets. This is due to, among other things, the potential for greater economic volatility, inflation, political and economic instability and more governmental limitations on foreign investments than typically found in more developed markets. Certain emerging market countries may also lack the infrastructure necessary to attract large amounts of foreign trade and investment. Local securities markets in emerging market countries may trade a small number of securities and may be unable to respond effectively to changes in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times. Settlement procedures in emerging market countries are frequently less developed and reliable than those in the U.S. (and other developed countries). In addition, significant delays may occur in certain markets in registering the transfer of securities. Settlement or registration problems may make it more difficult for the Fund to value its portfolio securities and could cause a Fund to miss attractive investment opportunities. Investing in emerging market countries involves a higher risk of loss due to expropriation, nationalization, confiscation of assets and property or the imposition of restrictions on foreign investments and on repatriation of capital invested by certain emerging market countries.

Equity Investing Risk. An investment in a Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of outperformance and underperformance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Recent turbulence in financial markets and reduced liquidity in credit and fixed income markets may negatively affect many issuers worldwide, which may have an adverse effect on a Fund.

ETF Risks.

- *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* Each Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Premium-Discount Risk.* The Shares may trade above or below their net asset value (“NAV”). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on an Exchange or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares. In addition, you may incur the cost of the “spread,” that is, any difference between the bid price and the ask price of the Shares. In addition, because securities held by a Fund may trade on foreign exchanges that are closed when its primary listing exchange is open, a Fund is likely to experience premiums and discounts greater than those of domestic ETFs.
- *Cost of Trading Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for Shares (the “bid” price) and the price at which an investor is willing to sell Shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads.
- *Trading Risk.* Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. When markets are stressed, Shares could suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads, which could cause some market makers and APs to reduce their market activity or “step away” from making a market in ETF shares. This could cause a Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the ETF arbitrage process. Further, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). There can be no assurance that the requirements of the Exchange necessary to maintain the listing of each Fund will continue to be met or will remain unchanged. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of a Fund’s

underlying portfolio holdings, which can be significantly less liquid than Shares, and this could lead to differences between the market price of the Shares and the underlying value of those Shares.

Foreign Investment Risk. Each Fund may invest in foreign securities, including non-U.S. dollar-denominated securities traded outside of the United States and U.S. dollar-denominated securities of foreign issuers traded in the United States. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Investments in foreign securities are subject to special risks, including the following:

- *Foreign Securities Risk.* Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Changes to the financial condition or credit rating of foreign issuers may also adversely affect the value of a Fund's securities. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Since foreign exchanges may be open on days when a Fund does not price its Shares, the value of the securities in a Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's shares. Conversely, Shares may trade on days when foreign exchanges are closed. Since foreign exchanges may be open on days when the Fund does not price its shares, the value of the securities in a Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's shares. Conversely, shares of a Fund may trade on days when foreign exchanges are closed. Investment in foreign securities may involve higher costs than investment in U.S. securities, including higher transaction and custody costs as well as the imposition of additional taxes by foreign governments. Each of these factors can make investments in a Fund more volatile and potentially less liquid than other types of investments. Each of these factors can make investments in a Fund more volatile and potentially less liquid than other types of investments.
- *Developed Market Risk.* Many developed market countries have recently experienced significant economic pressures. Developed market countries generally tend to rely on the services sectors (e.g., the financial services sector) as the primary source of economic growth and may be susceptible to the risks of individual service sectors. Recently, new concerns have emerged with respect to the economic health of certain developed countries. These concerns primarily stem from heavy indebtedness of many developed countries and their perceived inability to continue to service high debt loads without simultaneously implementing stringent austerity measures. Such concerns have led to tremendous downward pressure on the economies of these countries. As a result, it is possible that interest rates on debt of certain developed countries may rise to levels that make it difficult for such countries to service high debt levels without significant help from other countries or from a central bank. Spending on health, health care and retirement pensions in most developed countries has risen dramatically over the last few years. Medical innovation, extended life expectancy and higher public expectations are likely to continue the increase in health care and pension costs. Any increase in health care and pension costs will likely have a negative impact on the economic growth of many developed countries. Developed market countries generally are dependent on the economies of certain key trading partners. Changes in any one economy may cause an adverse impact on several developed countries. In addition, heavy regulation of, among others, labor and product markets may have an adverse effect on certain issuers. Such regulations may negatively affect economic growth or cause prolonged periods of recession.

In a referendum held in 2016, the United Kingdom resolved to leave the EU, an event commonly known as "Brexit." The United Kingdom officially left the EU on January 31, 2020. However, in December, 2020, the United Kingdom and the EU successfully reached a trade and cooperation agreement. Under that agreement, there will not be any tariffs levied or restrictive quotas imposed, but there will be new customs and regulatory checks, which will increase the burden on trading partners between the United Kingdom and the EU. The economic impact of Brexit is still uncertain, and additional economic stresses for the United Kingdom. The potential remains for decreased trade, capital outflows, devaluation of the British pound, wider corporate bond spreads due to uncertainty, and declines in business and consumer spending as well as foreign direct investment. The short- and long-term effect of the withdrawal and new relationship may negatively impact an ETF's investment in the region.

- *Capital Controls and Sanctions Risk.* Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to government intervention and the imposition of "capital controls" or expropriation or nationalization of assets. The possible establishment of exchange controls or freezes on the convertibility of currency, or the adoption of other governmental restrictions, might adversely affect an investment in foreign securities. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets within or out of a jurisdiction. Levies may be placed on profits repatriated by foreign entities. Capital controls may impact the ability of a Fund to buy, sell or otherwise transfer securities or currency, may adversely affect the trading market and price for Shares, and may cause a Fund to decline in value.

- **Currency Exchange Rate Risk.** Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of each Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in a Fund may also change quickly, unpredictably, and without warning, and you may lose money.
- **Political and Economic Risk.** A Fund that invests in foreign securities is subject to foreign political and economic risk not associated with U.S. investments, meaning that political events (civil unrest, national elections, changes in political conditions and foreign relations, imposition of exchange controls and repatriation restrictions), social and economic events (labor strikes, rising inflation) and natural disasters occurring in a foreign country could cause a Fund's investments to experience gains or losses. A Fund also could be unable to enforce its ownership rights or pursue legal remedies in countries where it invests.
- **Foreign Market and Trading Risk.** The trading markets for many foreign securities are not as active as U.S. markets and may have less governmental regulation and oversight. Foreign markets also may have clearance and settlement procedures that make it difficult for a Fund to buy and sell securities. The procedures and rules governing foreign transactions and custody also may involve delays in payment, delivery or recovery of money or investments. These factors could result in a loss to a Fund by causing it to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing a Fund's assets to be uninvested for some period of time.

Investment Risk. When you sell your Shares, they could be worth less than what you paid for them. A Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security. Geopolitical and other risks, including war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises, and environmental disasters such as earthquakes, fire, and floods, may add to instability in world economies and volatility in markets generally. Changes in trade policies and international trade agreements could affect the economies of many countries in unpredictable ways. The value of a security may also decline due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in a Fund.

Large-Capitalization Companies Risk (*Global ETF only*). Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years. Larger, more established companies may be slow to respond to challenges and may grow more slowly than smaller companies.

Management Risk. Each Fund is actively-managed and may not meet its investment objective based on the Adviser's, Sub-Adviser's, or portfolio managers' success or failure to implement investment strategies for each Fund. The success of each Fund's investment program depends largely on the investment techniques and risk analyses applied by the Adviser, Sub-Adviser, and the portfolio managers and the skill of the Adviser, Sub-Adviser, and/or portfolio managers in evaluating, selecting, and monitoring a Fund's assets. Each Fund could experience losses (realized and unrealized) if the judgment of the Adviser, Sub-Adviser, or portfolio managers about markets or sectors or the attractiveness of particular investments made for a Fund's portfolio prove to be incorrect. It is possible the investment techniques and risk analyses employed on behalf of a Fund.

MLP Risk. Investment in securities of an MLP involves risks that differ from investments in common stock, including risks related to limited control and limited rights to vote on matters affecting the MLP, risks related to potential conflicts of interest between the MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's right to require unit-holders to sell their common units at an undesirable time or price. Certain MLP securities may trade in low volumes due to their small capitalizations. Accordingly, those MLPs may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price. MLPs are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns. MLPs may incur environmental costs and liabilities due to the nature of their businesses and the substances they handle. Changes in existing laws, regulations or enforcement policies governing the energy sector could significantly increase the compliance costs of MLPs. Demand for investment opportunities in MLPs that operate energy-related businesses may exceed supply, which could make it difficult to operate the Fund.

New Fund Risk. The Funds are a recently organized management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that each Fund will grow to or maintain an economically viable size.

New Sub-Adviser Risk. Although the Sub-Adviser's principals and the Fund's portfolio managers have experience managing investments in the past, the Sub-Adviser has no experience managing investments for an ETF, which may limit the Sub-Adviser's effectiveness.

Non-Diversification Risk. A non-diversified fund may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

REITs Risk. Equity REITs may be affected by changes in the value of the underlying properties owned by the trusts. Mortgage REITs are exposed to risks associated with changes in interest rates, changes in credit spreads, and declines in real estate values. Debt investments are also subject to loss in value due to high or sustained inflation because the debt could be paid back in significantly depreciated currency. Further, REITs are dependent upon specialized management skills and cash flows, and may have investments in relatively few properties, or in a small geographic area or a single property type. In addition, REITs could possibly fail to qualify for tax free pass-through of income under the Internal Revenue Code of 1986, as amended, or to maintain their exemptions from registration under the 1940 Act. The failure of a company to qualify as a REIT under federal tax law may have adverse consequences to the Fund. The above factors may also adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of a default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments. In addition, REITs have their own expenses, and the Fund will bear a proportionate share of those expenses. Further, dividends paid by REITs are taxed as ordinary income and generally do not qualify for the preferential rate applicable to qualified dividend income. REITs may be more volatile and/or more illiquid than other types of securities.

Risk of Investing in the U.S. A decrease in imports or exports, changes in trade regulations, inflation and/or an economic recession in the U.S. may have a material adverse effect on the U.S. economy and the securities listed on U.S. exchanges. Proposed and adopted policy and legislative changes in the U.S. are changing many aspects of financial, commercial, public health, environmental, and other regulation and may have a significant effect on U.S. markets generally, as well as on the value of certain securities. Governmental agencies project that the U.S. will continue to maintain elevated public debt levels for the foreseeable future. Although elevated debt levels do not necessarily indicate or cause economic problems, elevated public debt service costs may constrain future economic growth. Circumstances could arise that could prevent the timely payment of interest or principal on U.S. government debt, such as reaching the legislative "debt ceiling." Such non-payment would result in substantial negative consequences for the U.S. economy and the global financial system. If U.S. relations with certain countries deteriorate, it could adversely affect U.S. issuers as well as non-U.S. issuers that rely on the U.S. for trade. The U.S. has also experienced increased internal unrest and discord. If these trends were to continue, it may have an adverse impact on the U.S. economy and the issuers in which a Fund invests.

Small- and Mid-Capitalization Company Risk. Investing in securities of small- and mid-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies. Small- and mid-capitalization companies and the industries in which they focus may still be evolving and, as a result, they may be more sensitive to changing market conditions. Small- and mid-capitalization companies often have less predictable earnings, more limited product lines, markets, distribution channels and financial resources, and the management of such companies may be dependent upon one or few people.

FUND MANAGEMENT

Investment Adviser

Empowered Funds, LLC dba EA Advisers serves as the Funds' investment adviser (the "Adviser"). The Adviser is located at 3803 West Chester Pike, Suite 150, Newtown Square, PA 19073 and is wholly-owned by Alpha Architect, LLC. The Adviser is registered with the Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940 and provides investment advisory services to the Funds other exchange-traded funds, and Alpha Architect, LLC, its parent company. The Adviser was founded in October 2013.

The Adviser selects the Funds' sub-adviser and oversees the sub-adviser's management of each Fund. The Adviser is responsible for overseeing the management and business affairs of the Funds, and has discretion to purchase and sell securities in accordance with each Fund's objectives, policies and restrictions. The Adviser continuously reviews, supervises and administers each Fund's investment programs pursuant to the terms of investment advisory agreement (the "Advisory Agreement") between the Trust and the Adviser. The Adviser is entitled to an annual advisory fee based on its average daily net assets for the services and facilities it provides payable at the annual rates set forth in the table below:

Fund	Advisory Fee
City Different Investments SMID Cap Core Equity ETF	0.75%
City Different Investments Global Equity ETF	0.75%

The Adviser (or an affiliate of the Adviser) bears all of the Adviser's own costs associated with providing these advisory services and all expenses of the Funds, except for the fee payment under the Advisory Agreement, payments under the Funds' Rule 12b-1 Distribution and Service Plan (the "Plan"), brokerage expenses, acquired fund fees and expenses (including affiliated funds' fees

and expenses), taxes (including tax-related services), interest (including borrowing costs), litigation expenses (including class action-related services) and other non-routine or extraordinary expenses.

The Advisory Agreement for the Funds provides that it may be terminated at any time, without the payment of any penalty, by the Board or, with respect to the Fund, by a majority of the outstanding shares of the Fund, on 60 days' written notice to the Adviser, and by the Adviser upon 60 days' written notice, and that it shall be automatically terminated if it is assigned. The Adviser retains the authority, pursuant to the terms of the investment sub-advisory agreement, to exercise its right to control the overall management of each Fund's assets.

Investment Sub-Adviser

The Adviser has retained City Different Holdings LP, dba City Different Investments, an investment adviser registered with the SEC, to provide sub-advisory services for the Funds. The Sub-Adviser is organized as a Delaware partnership with its principal office located at 925 Paseo De Peralta, Santa Fe, New Mexico 87501, and was founded in November 2020. The Sub-Adviser offers investment management services to individual and institutional clients, as well as the Funds, and primarily allocates client assets among various ETFs, and individual debt and equity securities in accordance with their stated investment objectives. The Sub-Adviser is responsible for determining the investments for the Funds, subject to the overall supervision and oversight of the Adviser and the Board.

The Sub-Adviser is not responsible for selecting brokers or placing each Fund's trades. Rather, the Sub-Adviser provides trade recommendations to the Adviser and, in turn, the Adviser is responsible for selecting brokers and placing each Fund's trades. It is anticipated that the Adviser will generally adhere to the Sub-Adviser's recommendations.

For its services, the Adviser pays Sub-Adviser a fee, which is calculated daily and paid monthly, at an annual rate based on each Fund's average daily net assets as follows:

Fund	Sub-Advisory Fee
City Different Investments SMID Cap Core Equity ETF	0.38%
City Different Investments Global Equity ETF	0.38%

Fund Sponsor

The Adviser has entered into a fund sponsorship agreement with the Sub-Adviser pursuant to which the Sub-Adviser is also the sponsor of the Funds ("Fund Sponsor"). Under this arrangement, the Fund Sponsor has agreed to provide financial support to the Funds (as described below) and, in turn, the Adviser has agreed to share with the Fund Sponsor a portion of profits, if any, generated by each Fund's Advisory Fee (also as described below). Every month, the Advisory Fee, which is a unitary management fee, is calculated and paid to the Adviser.

If the amount of the unitary management fee exceeds each Fund's operating expenses and the Adviser-retained amount, the Adviser pays the net total to the Fund Sponsor. The amount paid to the Fund Sponsor represents both the sub-advisory fee and any remaining profits from the Advisory Fee. During months where there are no profits or the funds are not sufficient to cover the entire sub-advisory fee, the sub-advisory fee is automatically waived.

If the amount of the unitary management fee is less than each Fund's operating expenses and the Adviser-retained amount, Fund Sponsor is obligated to reimburse the Adviser for the shortfall.

The Adviser-retained amount represents an agreed upon fee arrangement between the Adviser and Fund Sponsor. This arrangement calls for the Fund Sponsor to pay the Adviser a fee and reimburse the Adviser for certain Fund operating expenses it paid pursuant to the Advisory Agreement.

APPROVAL OF ADVISORY AGREEMENT & INVESTMENT SUB-ADVISORY AGREEMENTS

A discussion regarding the basis for the Board's approval of the Advisory Agreement and the Sub-Advisory Agreement with respect to the Funds will be available in each Fund's first Form N-CSR to shareholders.

Manager of Managers Structure

The Adviser and the Trust have received an exemptive order (the "Order") from the SEC that allows each Fund to operate in a "manager of managers" structure whereby the Adviser can appoint and replace unaffiliated sub-advisers, and enter into, amend and terminate sub-advisory agreements with such sub-advisers, each subject to Board approval, but without obtaining prior shareholder approval ("Manager of Managers Structure"). Each Fund will, however, inform shareholders of the hiring of any new sub-adviser within 90 days after the hiring, to the extent the Fund is relying on the Order. The Order provides each Fund with greater flexibility and efficiency by preventing the Fund from incurring the expense and delays associated with obtaining shareholder approval of such sub-advisory agreements.

To the extent each Fund relies on the Order, a Fund's use of the Manager of Managers Structure is subject to certain conditions that are set forth in the Order. Under the Manager of Managers Structure, the Adviser has the ultimate responsibility, subject to oversight by the Board, to oversee sub-advisers and recommend their hiring, termination and replacement. The Adviser will also, subject to the review and approval of the Board; set each Fund's overall investment strategy; evaluate, select and recommend sub-advisers to manage all or a portion of each Fund's assets; and implement procedures reasonably designed to ensure that each sub-adviser complies with each Fund's investment goal, policies and restrictions. Subject to review by the Board, the Adviser will allocate and, when appropriate, reallocate each Fund's assets among sub-advisers and monitor and evaluate the sub-advisers' performance.

PORTFOLIO MANAGERS

The portfolio managers are jointly and primarily responsible for various functions related to portfolio management, including, but not limited to, making recommendations (or implementing) with respect to the following: investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of the portfolio management team with more limited responsibilities.

SMID Cap Core Equity ETF:

Rob MacDonald, CFA. Mr. MacDonald is an equity Portfolio Manager and a founding partner at City Different Investments (since 2020), with more than twenty years of industry experience. Previously, he was a Portfolio Manager and Managing Director at Thornburg Investment Management. During Rob's 13 years at Thornburg, he managed multi-cap domestic equity strategies. Prior to that, Mr. MacDonald worked as an investment associate within the central research department at Putnam Investments. He holds a BA in economics and computer science from Amherst College, where he was an all-American in hockey. Mr. MacDonald received his MBA from the University of Chicago Booth School of Business and is a CFA charter holder.

Connor Browne, CFA. Mr. Browne is the founding CEO and equity Portfolio Manager at City Different Investments (since 2020). Before founding City Different Investments, Connor spent nearly 20 years at Thornburg Investment Management as a Portfolio Manager and Managing Director, where he ran long-only strategies (beginning in 2006) and founded a long/short equity strategy (in 2008). Mr. Browne managed nearly \$2B in assets at year-end 2019. He grew up with the firm, as assets increased from \$3B during his undergrad summer internship to nearly \$100B at its peak. He was named a partner in 2006 and was perennially involved in firmwide strategic planning. After leaving Thornburg in early 2020, Mr. Browne led the New Mexico Recovery Fund, a \$100m government-backed direct lending fund created to aid New Mexico-based businesses during the pandemic. He is a graduate of Princeton University and a CFA charter holder.

Global Equity ETF:

Vinson Walden. Mr. Walden is a founder and Portfolio Manager at City Different Investments (since 2020). Prior to that, Mr. Walden was Co-Founder and Co-Portfolio Manager of Thornburg Global Opportunities Fund from 2006 to January 2020. He was previously an Associate at Lehman Brothers in New York and Hong Kong. Mr. Walden received a BSBA from Boston University and an MBA from Columbia University.

The Statement of Additional Information ("SAI") provides additional information about the portfolio managers, including other accounts each manages, their ownership in each Fund, and compensation.

OTHER SERVICE PROVIDERS

PINE Distributors LLC ("Distributor") serves as the distributor of Creation Units (defined above) for the Funds on an agency basis. The Distributor does not maintain a secondary market in Shares.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, is the administrator, fund accountant, and transfer agent for the Funds.

U.S. Bank National Association is the custodian for the Funds.

Practus, LLP, 11300 Tomahawk Creek Parkway, Suite 310, Leawood, Kansas 66211, serves as legal counsel to the Trust.

Tait, Weller & Baker LLP, 50 South 16th Street, Suite 2900, Philadelphia, Pennsylvania 19102, serves as each Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of each Fund.

THE EXCHANGE

Shares are not sponsored, endorsed or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in, the determination of the timing of, prices of, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing or trading of Shares. Without limiting any of the foregoing, in no event shall the Exchange have any

liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

BUYING AND SELLING FUND SHARES

Each Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. Creation Units are generally issued and redeemed only in-kind for securities although a portion may be in cash.

Shares will trade on the secondary market, however, which is where most retail investors will buy and sell Shares. It is expected that only a limited number of institutional investors, called Authorized Participants or “APs,” will purchase and redeem Shares directly from the Funds. APs may acquire Shares directly from the Funds, and APs may tender their Shares for redemption directly to the Funds, at NAV per Share only in large blocks, or Creation Units. Purchases and redemptions directly with each Fund must follow the Fund’s procedures, which are described in the SAI.

Except when aggregated in Creation Units, Shares are not redeemable with each Fund.

BUYING AND SELLING SHARES ON THE SECONDARY MARKET

Most investors will buy and sell Shares in secondary market transactions through brokers and, therefore, must have a brokerage account to buy and sell Shares. Shares can be bought or sold through your broker throughout the trading day like shares of any publicly traded issuer. The Trust does not impose any redemption fees or restrictions on redemptions of Shares in the secondary market. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered prices in the secondary market for Shares. The price at which you buy or sell Shares (*i.e.*, the market price) may be more or less than the NAV of the Shares. Unless imposed by your broker, there is no minimum dollar amount you must invest in the Funds and no minimum number of Shares you must buy.

Shares of each Fund are listed on the Exchange under the following symbol:

Fund	Trading Symbol
City Different Investments SMID Cap Core Equity ETF	CDSM
City Different Investments Global Equity ETF	CDIG

The Exchange is generally open Monday through Friday and is closed for weekends and the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Washington’s Birthday, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

For information about buying and selling Shares on the Exchange or in the secondary markets, please contact your broker or dealer.

Book Entry. Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”), or its nominee, will be the registered owner of all outstanding Shares and is recognized as the owner of all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely on the procedures of DTC and its participants. These procedures are the same as those that apply to any stocks that you hold in book entry or “street name” through your brokerage account. Your account information will be maintained by your broker, which will provide you with account statements, confirmations of your purchases and sales of Shares, and tax information. Your broker also will be responsible for distributing income dividends and capital gain distributions and for ensuring that you receive shareholder reports and other communications from the Funds.

Share Trading Prices. The trading prices of Shares may differ from the applicable Fund’s daily NAV and can be affected by market forces of supply and demand for Shares, the prices of the applicable Fund’s portfolio securities, economic conditions and other factors.

The Exchange through the facilities of the Consolidated Tape Association or another market information provider intends to disseminate the approximate value of each Fund’s portfolio every fifteen seconds during regular U.S. trading hours. This approximate value should not be viewed as a “real-time” update of the NAV of the fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day. The quotations for certain investments may not be updated during U.S. trading hours if such holdings do not trade in the U.S., except such quotations may be updated to reflect currency fluctuations. Each Fund is not involved in, or responsible for, the calculation or dissemination of the approximate values and makes no warranty as to the accuracy of these values.

Continuous Offering. The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Funds on an ongoing basis, a “distribution,” as such term is used in the Securities Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirements and liability provisions of the Securities Act. For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the Investment Company Act of 1940, as amended (the “Investment Company Act”). As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an over-allotment within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

ACTIVE INVESTORS AND MARKET TIMING

The Board has evaluated the risks of market timing activities by the Funds’ shareholders. The Board noted that Shares can be purchased and redeemed directly from the Funds only in Creation Units by APs and that the vast majority of trading in Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Funds, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in each Fund’s trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Funds, to the extent effected in-kind (*i.e.*, for securities), the Board noted that those trades do not cause the harmful effects (as previously noted) that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution to the Funds and increased transaction costs, which could negatively impact each Fund’s ability to achieve its investment objective, although in certain circumstances (*e.g.*, in conjunction with a reallocation of each Fund’s investments), such trades may benefit Fund shareholders by increasing the tax efficiency of the Funds. The Board also noted that direct trading by APs is critical to ensuring that Shares trade at or close to NAV. In addition, the Funds will impose transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Funds in effecting trades. Given this structure, the Board determined that it is not necessary to adopt policies and procedures to detect and deter market timing of Shares.

DISTRIBUTION AND SERVICE PLAN

Each Fund has adopted the Plan pursuant to Rule 12b-1 under the Investment Company Act. Under the Plan, each Fund may be authorized to pay distribution fees of up to 0.25% of its average daily net assets each year to the Distributor and other firms that provide distribution and shareholder services (“Service Providers”). As of the date of this Prospectus, the maximum amount payable under the Plan is set at 0% until further action by the Board. In the event 12b-1 fees are charged, over time they would increase the cost of an investment in the Funds because they would be paid on an ongoing basis.

NET ASSET VALUE

The NAV of Shares is calculated each business day as of the close of regular trading on the New York Stock Exchange (“NYSE”), generally 4:00 p.m., Eastern time.

Each Fund calculates its NAV per Share by:

- Taking the current market value of its total assets,
- Subtracting any liabilities, and
- Dividing that amount by the total number of Shares owned by shareholders.

If you buy or sell Shares on the secondary market, you will pay or receive the market price, which may be higher or lower than NAV. Your transaction will be priced at NAV only if you purchase or redeem your Shares in Creation Units.

Because securities listed on foreign exchanges may trade on weekends or other days when each Fund does not price its Shares, the NAV of the Fund, to the extent it may hold foreign securities, may change on days when shareholders will not be able to purchase

or sell Shares. In particular, where all or a portion of each Fund's underlying securities trade in a market that is closed when the market in which the Fund's shares are listed and trading in that market is open, there may be changes between the last quote from its closed foreign market and the value of such security during the Fund's domestic trading day. In addition, please note that this in turn could lead to differences between the market price of each Fund's shares and the underlying value of those shares.

Equity securities that are traded on a national securities exchange, except those listed on the NASDAQ Global Market® ("NASDAQ") are valued at the last reported sale price on the exchange on which the security is principally traded. Securities traded on NASDAQ will be valued at the NASDAQ Official Closing Price ("NOCP"). If, on a particular day, an exchange-traded or NASDAQ security does not trade, then the most recent quoted bid for exchange traded or the mean between the most recent quoted bid and ask price for NASDAQ securities will be used. Equity securities that are not traded on a listed exchange are generally valued at the last sale price in the over-the-counter market. If a nonexchange traded security does not trade on a particular day, then the mean between the last quoted closing bid and asked price will be used.

The value of assets denominated in foreign currencies is converted into U.S. dollars using exchange rates deemed appropriate by the Funds.

Redeemable securities issued by open-end investment companies are valued at the investment company's applicable net asset value, with the exception of exchange-traded open-end investment companies which are priced as equity securities.

If a market price is not readily available or is deemed not to reflect market value, the Funds will determine the price of the security held by the Fund based on a determination of the security's fair value pursuant to policies and procedures approved by the Board.

To the extent each Fund holds securities that may trade infrequently, fair valuation may be used more frequently. Fair valuation may have the effect of reducing stale pricing arbitrage opportunities presented by the pricing of Shares. However, when each Fund uses fair valuation to price securities, it may value those securities higher or lower than another fund would have priced the security. Also, the use of fair valuation may cause the Shares' NAV performance to diverge from the Shares' market price and from the performance of various benchmarks used to compare each Fund's performance because benchmarks generally do not use fair valuation techniques. Because of the judgment involved in fair valuation decisions, there can be no assurance that the value ascribed to a particular security is accurate.

FUND WEBSITE AND DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust maintains a website for the Funds at <https://cdifunds.com/>. Among other things, the website includes this Prospectus and the SAI, and will include the Funds' annual and semi-annual reports to shareholders, financial information, holdings, and proxy information. The website shows each Fund's daily NAV per share, market price, and premium or discount, each as of the prior business day. The website also shows the extent and frequency of each Fund's premiums and discounts. Further, the website includes each Fund's median bid-ask spread over the most recent thirty calendar days.

Each day a Fund is open for business, the Trust publicly disseminates each Fund's full portfolio holdings as of the close of the previous day through its website at <https://cdifunds.com/>. A description of the Trust's policies and procedures with respect to the disclosure of a Fund's portfolio holdings is available in the SAI.

INVESTMENTS BY OTHER INVESTMENT COMPANIES

For purposes of the Investment Company Act, Shares are issued by a registered investment company and purchases of such Shares by registered investment companies and companies relying on Section 3(c)(1) or 3(c)(7) of the Investment Company Act are subject to the restrictions set forth in Section 12(d)(1) of the Investment Company Act, except as permitted by Rule 6c-11, Rule 12d1-4, or an exemptive order of the SEC.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Dividends and Distributions

Dividends and Distributions. Each Fund intends to qualify each year as a regulated investment company under the Internal Revenue Code of 1986, as amended. As a regulated investment company, a Fund generally pays no U.S. federal income tax on the

income and gains it distributes to you. Each Fund expects to declare and to distribute its net investment income, if any, to shareholders as dividends annually. Each Fund will distribute net realized capital gains, if any, at least annually. A Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate U.S. federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee a Fund will pay either an income dividend or a capital gains distribution. Distributions may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Avoid "Buying a Dividend." At the time you purchase Shares of a Fund, the Shares' purchase price may reflect undistributed income, undistributed capital gains, or net unrealized appreciation in value of portfolio securities held by the Fund. For taxable investors, a subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. Buying Shares in a Fund just before it declares an income dividend or capital gains distribution is sometimes known as "buying a dividend."

Taxes

Tax Considerations. Each Fund expects that its distributions, if any, will be taxable as ordinary income, capital gains, or some combination of both. This is true whether you reinvest your distributions in additional Shares or receive them in cash. For U.S. federal income tax purposes, Fund distributions of short-term capital gains are taxable to you as ordinary income. Fund distributions of long-term capital gains are taxable to you as long-term capital gains no matter how long you have owned your Shares. A portion of income dividends reported by a Fund may be qualified dividend income eligible for taxation by certain shareholders at long-term capital gains rates provided certain holding period and other requirements are met.

Taxes on Sales of Shares. A sale or exchange of Shares is a taxable event and, accordingly, a capital gain or loss will generally be recognized. Currently, any capital gain or loss realized upon a sale of Shares generally is treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses may be limited.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from a Fund and net gains from sales or other taxable dispositions of Shares) of U.S. individuals, estates, and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds a threshold amount. This Medicare tax, if applicable, is reported by you on, and paid with, your U.S. federal income tax return.

Backup Withholding. If you do not provide the applicable Fund with your proper taxpayer identification number and certain required certifications, you may be subject to backup withholding on any distributions of income, capital gains or proceeds from the sale of your Shares. A Fund also must backup withhold if the Internal Revenue Service ("IRS") instructs it to do so. When backup withholding is required, the amount will be 24% of any distributions or proceeds paid.

State and Local Taxes. Fund distributions and gains from the sale or exchange of your Shares generally are subject to applicable state and local income taxes.

Taxes on Purchase and Redemption of Creation Units. An AP who exchanges securities for Creation Units generally will recognize a taxable gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of purchase and the exchanger's aggregate tax basis in the securities surrendered and any cash amount paid. A person who exchanges Creation Units for securities generally will recognize a taxable gain or loss equal to the difference between the exchanger's tax basis in the Creation Units and the aggregate market value of the securities received and any cash amount received. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisors with respect to whether the wash sale rules apply and when a loss might not be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

If a Fund redeems Creation Units in cash, it may recognize more capital gains than it would have had it redeemed Creation Units in-kind.

Foreign Tax Credits. If a Fund qualifies to pass through to you the tax benefits from foreign taxes it pays on its investments, and elects to do so, then any foreign taxes it pays on these investments may be passed through to you as a foreign tax credit.

Non-U.S. Investors. Non-U.S. investors may be subject to U.S. federal income tax withholding at a 30% or lower treaty rate and are subject to special U.S. federal income tax certification requirements to avoid backup withholding and claim any treaty benefits. An exemption from U.S. federal income tax withholding is provided for capital gain distributions paid by a Fund from long-term capital gains, if any. In addition, interest-related dividends paid by a Fund from its qualified net interest income from

U.S. sources and short-term capital gain dividends may be exempt from U.S. federal income tax withholding provided the Fund makes certain designations and other requirements are met. Furthermore, notwithstanding such exemptions from U.S. federal income tax withholding at the source, any such dividends and distributions of income and capital gains will be subject to U.S. federal income tax backup withholding at a rate of 24% if you fail to properly certify that you are not a U.S. person. In addition, U.S. estate tax may apply to Shares of a Fund.

Other Reporting and Withholding Requirements. Under the Foreign Account Tax Compliance Act (FATCA), each Fund will be required to withhold a 30% tax on (i) income dividends paid by the Fund, and (ii) possibly in the future, certain capital gain distributions and the proceeds arising from the sale of Shares paid by the Fund, to certain foreign entities, referred to as foreign financial institutions or non-financial foreign entities, that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. A Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of a Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Possible Tax Law Changes. At the time that this prospectus is being prepared, various administrative and legislative changes to the U.S. federal tax laws are under consideration, but it is not possible at this time to determine whether any of these changes will be made or what the changes might entail.

This discussion of “Dividends, Distributions and Taxes” is not intended or written to be used as tax advice. Because everyone’s tax situation is unique, you should consult your own tax professional about the U.S. federal, state, local and foreign tax consequences before making an investment in a Fund.

FINANCIAL HIGHLIGHTS

Each Fund is newly organized and therefore has not yet had any operations as of the date of this Prospectus and does not have financial highlights to present at this time.

If you would like more information about the Funds and the Trust, the following documents are available free, upon request:

ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS

Additional information about each Fund will be in its annual and semi-annual reports to shareholders and in Form N-CSR. The annual report explains the market conditions and investment strategies affecting each Fund's performance during the last fiscal year. In Form N-CSR, you will find the Fund's annual and semi-annual financial statements.

STATEMENT OF ADDITIONAL INFORMATION

The SAI dated September 10, 2025, which contains more details about the Funds, is incorporated by reference in its entirety into this Prospectus, which means that it is legally part of this Prospectus.

Recent information regarding each Fund covered by this Prospectus, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund's website listed below. To receive a free copy of the latest annual or semi-annual report, or the SAI, or to request additional information about the Funds, please contact us as follows:
