RACWI US ETF

Fund Summary

INVESTMENT OBJECTIVE

The RACWI US ETF (the “Fund”) seeks to track the total return performance, before fees and expenses, of the RACWI US Index (the “Index”).

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table or example.**

| Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment) | |
|---|--------------|
| Management Fee | 0.15% |
| Distribution and/or Service (12b-1) Fees | None |
| Other Expenses ¹ | 0.00% |
| Total Annual Fund Operating Expenses | 0.15% |
| Less Fee Waiver ² | (0.15%) |
| Total Annual Fund Operating Expenses After Fee Waiver | 0.00% |

¹ Other Expenses are estimated for the current fiscal year.

² The Fund’s investment adviser has contractually agreed to reduce its management fee from 0.15% to 0.00% of the Fund’s average daily net assets. The Fee Waiver Agreement does not provide for recoupment of waived management fees and it will remain in place until October 31, 2026 unless terminated sooner by the Trustees.

EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then hold or sell all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

| One Year: | Three Years: |
|------------------|---------------------|
| \$0 | \$33 |

PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. As of the date of this Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

PRINCIPAL INVESTMENT STRATEGIES

The Fund uses a “passive management” (or indexing) approach to seek to track the total return performance, before fees and expenses, of the Index. The Index is comprised of U.S. listed companies selected based on a proprietary methodology developed and maintained by RAFI Indices, LLC (the “Index Provider”). Research Affiliates, LLC, an affiliate of the Index Provider, serves as the sub-adviser to the Fund (the “Sub-Adviser”). Unlike many investment companies, the Fund does not try to “beat” the index it tracks and does not seek temporary defensive positions when markets decline or appear overvalued.

RACWI US Index

The Index was created to provide exposure to U.S. listed companies based on a fundamental value factor instead of market capitalization alone. The Index Provider believes, based on its internal research, that capitalization weighted indexes generally add and delete companies at the wrong time. Capitalization-weighted indexes are typically structured to add new constituents after a company’s stock price has increased significantly and remove a company after its stock price has dropped significantly. Capitalization-weighted indexes are also designed to increase a company’s weighting as its stock price increases which, in the Index Provider’s opinion, results in a systematic overweight to the most overvalued companies and a systematic underweight to the most undervalued companies. To avoid this perceived valuation issue, the Index Provider has designed the Index to identify and select companies that are beginning to experience growth and increased relevance in their industry and remove companies that are experiencing declines in value and relevance in their industry.

When selecting companies for inclusion in the Index, the Index Provider employs a combination of fundamental valuation measures and market-capitalization weighting. The company selection process begins by integrating four equally weighted fundamental valuation measures to determine the relative company size within the Fund's investment universe. The four fundamental valuation metrics are:

- Adjusted Sales: Calculated as company sales multiplied by the equity-to-assets ratio, averaged over the past five years.
- Adjusted Cash Flow: Operating cash flow averaged over the past five years, including research and development (R&D) expenses.
- Dividends + Buybacks: Average dividends paid and share buybacks over the past five years.
- Book Value + Intangibles: Current book value plus accumulated depreciated R&D over the past six years.

Based on the fundamental valuation review, the top 86% of companies by cumulative fundamental weight within the Fund's U.S. listed investment universe are selected for inclusion in the Index. The Index Provider then weights the selected securities by their float-adjusted market capitalization. A company's float-adjusted capitalization is calculated by taking the company's stock price and multiplying it by the number of shares readily available in the market.

The Index is reconstituted and rebalanced annually, after the close of trading on the third Friday of March, based on data at the close of business on the second Friday of February. The maximum allowable weight for any single company is capped at 25%, and the aggregate weight of all constituents individually comprising 5% or more of the Index must not exceed 50% of the total Index composition. In the event that these constraints are breached, a special quarterly rebalance will be implemented to adjust the weights of the affected securities. The rebalancing process will involve proportionate reductions in the weights of the impacted stocks, with the redistributed weights allocated among the remaining constituents. These special quarterly rebalances will take place on the third Friday of June, September, or December, based on data at the close of business on the second Friday of May, August and November, respectively. The Fund adheres to the Index's schedule for annual reconstitution and rebalancing and it will adhere to any special quarterly rebalances by the Index.

The Fund's Investment Strategy

Under normal circumstances, at least 80% of the Fund's net assets (plus any borrowings for investment purposes) will be invested in the component securities of the Index. The Index is designed to be a measure of the performance of U.S. listed stocks that meet the Index's inclusion criteria.

The Sub-Adviser intends to generally employ "representative sampling" to achieve the Fund's investment objective. A representative sampling strategy, means the Fund will invest in a sample of the securities in the Index whose risk, return, and other characteristics closely resemble the risk, return, and other characteristics of the Index as a whole, as determined by the Sub-Adviser. Because the Fund uses a representative sampling indexing strategy, it can be expected to have a larger tracking error (i.e., the divergence of the Fund's performance from that of the Index) than if it used a replication indexing strategy. "Replication" is an indexing strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The Fund will not concentrate its investments in a particular industry or group of industries, as that term is used in the Investment Company Act of 1940, as amended (the "Investment Company Act"), except that the Fund will invest more than 25% of its total assets in securities of the same industry to approximately the same extent that the Index concentrates in the securities of a particular industry or group of industries.

The Fund is classified as "non-diversified" under the Investment Company Act of 1940, as amended, which means the Fund may take larger positions in a fewer number of issuers.

PRINCIPAL INVESTMENT RISKS

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. More complete risk descriptions are set forth below under the heading "*Additional Information About the Fund's Principal Investment Risks.*"

Large-Capitalization Companies Risk. Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

Mid-Capitalization Companies Risk. Investing in securities of mid-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies. Often mid-capitalization companies and the industries in which they focus are still evolving and, as a result, they may be more sensitive to changing market conditions.

Micro- and Small-Capitalization Companies Risk. Investing in securities of micro-cap and small-cap companies generally involves greater risks than investing in large-capitalization companies. Micro- and small-cap companies may have limited product lines, markets or financial resources or may depend on the expertise of a few people and may be subject to more abrupt or erratic market movements than securities of larger companies or market indices in general. Many micro and small capitalization companies may be in the early stages of development. Since equity securities of smaller companies may lack sufficient market liquidity and may not be regularly traded, it may be difficult or impossible to sell securities at an advantageous time or a desirable price.

Risk of Investing in the U.S. Certain changes in the U.S. economy, such as when the U.S. economy weakens or when its financial markets decline, may have an adverse effect on the securities to which the Fund has exposure.

Investment Risk. When you sell your Shares, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security. Geopolitical and other risks, including war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises, and environmental disasters such as earthquakes, fire, and floods, may add to instability in world economies and volatility in markets generally. Changes in trade policies and international trade agreements could affect the economies of many countries in unpredictable ways. The value of a security may also decline due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

ETF Risks.

- *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Premium-Discount Risk.* The Shares may trade above or below their net asset value (“NAV”). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on The Nasdaq Stock Market, LLC (the “Exchange”) or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares. In addition, you may incur the cost of the “spread,” that is, any difference between the bid price and the ask price of the Shares.
- *Cost of Trading Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares.
- *Trading Risk.* Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be less liquid than Shares, potentially causing the market price of Shares to deviate from its NAV. The spread varies over time for Shares of the Fund based on the Fund’s trading volume and market liquidity and is generally lower if the Fund has high trading volume and market liquidity, and higher if the Fund has little trading volume and market liquidity (which is often the case for funds that are newly launched or small in size).

Non-Diversification Risk. Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

Concentration Risk. The Fund may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, to the extent that the Fund’s investments are concentrated in the securities of a particular issuer or issuers, market, industry, group of industries, sector, or asset class.

Passive Investment Risk. The Fund is not actively managed and the Sub-Adviser will not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index, sold in

connection with a rebalancing of the Index, or sold to comply with the Fund's investment limitations (for example, to maintain the Fund's tax status). Maintaining investments regardless of market conditions or the performance of individual investments could cause the Fund's return to be lower than if the Fund employed an active strategy.

Tracking Error Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index. The Fund's use of a representative sampling strategy to track the Index, may produce greater tracking error than if the Fund employed a full replication strategy.

Sampling Risk. To the extent the Fund uses a representative sampling approach, it will hold a smaller number of securities than are in the Index. As a result, an adverse development respecting a security held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Index. Conversely, a positive development relating to a security in the Index that is not held by the Fund could cause the Fund to underperform the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

Index Calculation Risk. The Index relies on various sources of information to assess the criteria of issuers included in the Index, including fundamental information that may be based on assumptions and estimates. Neither the Fund, the Adviser, the Sub-Adviser nor the index administrator can offer assurances that the Index's calculation methodology or sources of information will provide a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

Annual Rebalance Risk. The Index's components are reconstituted annually. As a result, the Index's exposure to one or more securities may be affected by significant price movements promptly following the annual reconstitution. Such lags between Index rebalancing may result in significant performance swings relative to the broader equity markets.

New Fund Risk. The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

PERFORMANCE

Performance information is not provided below because the Fund has not yet been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund's average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Updated performance information will be available at <https://rafietfs.com/>.

INVESTMENT ADVISER

Investment Adviser: Empowered Funds, LLC dba EA Advisers (the "Adviser").

Investment Sub-Adviser: Research Affiliates, LLC (the "Sub-Adviser")

PORTFOLIO MANAGERS

Messrs. Wm. Joshua Russell, Senior Portfolio Manager, and Richard Shaner, Portfolio Manager, have been the portfolio managers for the Fund since the Fund's its inception.

PURCHASE AND SALE OF SHARES

Individual Shares are listed on a national securities exchange and may only be purchased and sold in the secondary market through a broker-dealer at a market price. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a "premium") or less than NAV (at a "discount"). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying and selling Shares in the secondary market (the "bid/ask spread").

TAX INFORMATION

The Fund's distributions generally are taxable to you as ordinary income, capital gain, or some combination of both, unless your investment is made through an Individual Retirement Account ("IRA") or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to U.S. federal income tax. You should consult your own tax advisor about your specific tax situation.

PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND'S INVESTMENT OBJECTIVE AND PRINCIPAL INVESTMENT STRATEGIES

The Fund's investment objective is a non-fundamental investment policy and may be changed without a vote of shareholders upon prior written notice to shareholders.

Indexing may eliminate the chance that the Fund will substantially outperform the Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by aiming to keep portfolio turnover low in comparison to actively managed funds.

Additional Information About the Index

The Index Provider is not affiliated with the Fund, the Adviser, the Fund's distributor, the Index Calculation Agent or any of their respective affiliates. The Index Provider has licensed the use of the Index to the Adviser, which has sub-licensed it to the Trust on behalf of the Fund. The Index Provider does not make investment decisions, provide investment advice, or otherwise act in the capacity of an investment adviser to the Fund, nor is involved in the calculation of the Index. The Index Provider is affiliated with the Fund's Sub-Adviser.

The Index Provider has retained an unaffiliated third party, Solactive AG, to serve as index calculator and benchmark administrator (referred to hereafter as "Solactive" or "Index Calculation Agent"). Solactive, using the applicable rules-based methodology, will calculate, maintain and disseminate the Index on a daily basis.

The Index Provider will monitor the results produced by Solactive to help ensure that the Index is being calculated in accordance with the applicable rules-based methodology.

The Index is calculated and published for RAFI Indices, LLC ("RI") by Solactive AG, and Solactive strives to ensure the correctness of the calculation. There is no obligation for RI—irrespective of possible obligations to issuers—to advise third parties, including investors and/or financial intermediaries, of any errors in the Index. The publication of the Index by RI is not a recommendation for capital investment and does not contain any assurance or opinion of RI regarding a possible investment in a financial instrument based on the Index.

ADDITIONAL INFORMATION ABOUT THE FUND'S PRINCIPAL INVESTMENT RISKS

The following information is in addition to, and should be read along with, the description of the Fund's principal investment risks in the sections titled "Fund Summary—Principal Investment Risks" above.

Large-Capitalization Companies Risk. Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

Mid-Capitalization Companies Risk. The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some of these companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies.

Micro- and Small-Capitalization Companies Risk. Investing in securities of micro-cap and small-cap companies generally involves greater risks than investing in large-capitalization companies. Micro- and small-cap companies may have limited product lines, markets or financial resources or may depend on the expertise of a few people and may be subject to more abrupt or erratic market movements than securities of larger companies or market indices in general. Many micro and small capitalization companies may be in the early stages of development. Since equity securities of smaller companies may lack sufficient market liquidity and may not be regularly traded, it may be difficult or impossible to sell securities at an advantageous time or a desirable price.

Risk of Investing in the U.S. A decrease in imports or exports, changes in trade regulations, inflation and/or an economic recession in the U.S. may have a material adverse effect on the U.S. economy and the securities listed on U.S. exchanges. Proposed and adopted policy and legislative changes in the U.S. are changing many aspects of financial, commercial, public health, environmental, and other regulation and may have a significant effect on U.S. markets generally, as well as on the value of certain securities. Governmental agencies project that the U.S. will continue to maintain elevated public debt levels for the foreseeable future. Although elevated debt levels do not necessarily indicate or cause economic problems, elevated public debt service costs may constrain future economic growth. Circumstances could arise that could prevent the timely payment of interest or principal on U.S. government debt, such as reaching the legislative "debt ceiling." Such non-payment would result in substantial negative consequences for the U.S. economy and the global financial system. If U.S. relations with certain countries deteriorate, it could adversely affect U.S. issuers as well as non-U.S. issuers that rely on the U.S. for trade. The U.S. has also

experienced increased internal unrest and discord. If these trends were to continue, it may have an adverse impact on the U.S. economy and the issuers in which the Fund invests.

Investment Risk. When you sell your Shares, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security. Geopolitical and other risks, including war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises, and environmental disasters such as earthquakes, fire, and floods, may add to instability in world economies and volatility in markets generally. Changes in trade policies and international trade agreements could affect the economies of many countries in unpredictable ways. The value of a security may also decline due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of outperformance and underperformance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Recent turbulence in financial markets and reduced liquidity in credit and fixed income markets may negatively affect many issuers worldwide, which may have an adverse effect on the Fund.

ETF Risks.

- *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Premium-Discount Risk.* The Shares may trade above or below their net asset value (“NAV”). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on The Nasdaq Stock Market, LLC (the “Exchange”) or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares. In addition, you may incur the cost of the “spread,” that is, any difference between the bid price and the ask price of the Shares.
- *Cost of Trading Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for Shares (the “bid” price) and the price at which an investor is willing to sell Shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads.
- *Trading Risk.* Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. When markets are stressed, Shares could suffer erratic or unpredictable trading activity, extraordinary volatility or wide bid/ask spreads, which could cause some market makers and APs to reduce their market activity or “step away” from making a market in ETF shares. This could cause the Fund’s market price to deviate, materially, from the NAV, and reduce the effectiveness of the ETF arbitrage process. Further, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares, and this could lead to differences between the market price of the Shares and the underlying value of those Shares.

Non-Diversification Risk. Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Shares and greater risk of loss.

Concentration Risk. The Fund may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, to the extent that the Fund's investments are concentrated in the securities of a particular issuer or issuers, market, industry, group of industries, sector, or asset class.

Passive Investment Risk. The Fund is not actively managed and the Sub-Adviser will not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index, sold in connection with a rebalancing of the Index, or sold to comply with the Fund's investment limitations (for example, to maintain the Fund's tax status). Maintaining investments regardless of market conditions or the performance of individual investments could cause the Fund's return to be lower than if the Fund employed an active strategy.

Tracking Error Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index. To the extent the Fund uses a representative sampling strategy to track the Index, such a strategy may produce greater tracking error than if the Fund employed a full replication strategy.

Sampling Risk. To the extent the Fund uses a representative sampling approach, it will hold a smaller number of securities than are in the Index. As a result, an adverse development respecting a security held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Index. Conversely, a positive development relating to a security in the Index that is not held by the Fund could cause the Fund to underperform the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

Index Calculation Risk. The Index relies on various sources of information to assess the criteria of issuers included in the Index, including fundamental information that may be based on assumptions and estimates. Neither the Fund, the Adviser, the Sub-Adviser nor the index administrator can offer assurances that the Index's calculation methodology or sources of information will provide a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

Annual Rebalance Risk. The Index's components are reconstituted annually. As a result, the Index's exposure to one or more securities may be affected by significant price movements promptly following the annual reconstitution. Such lags between Index rebalancing may result in significant performance swings relative to the broader equity markets.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

FUND MANAGEMENT

Empowered Funds, LLC dba EA Advisers serves as the Fund's investment adviser (the "Adviser"). The Adviser is located at 3803 West Chester Pike, Suite 150, Newtown Square, PA 19073 and is wholly-owned by Alpha Architect, LLC. The Adviser is registered with the Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940 and provides investment advisory services to the Fund, other exchange-traded funds, and Alpha Architect, LLC, its parent company. The Adviser was founded in October 2013.

The Adviser selects the Fund's sub-adviser and oversees the sub-adviser's management of the Fund. In addition, the Adviser provides trading, execution and various other administrative services and supervises the overall daily affairs of the Fund, subject to the general supervision and control of the Board. The Adviser performs its services to the Fund pursuant to the terms of an investment advisory agreement (the "Advisory Agreement") between the Trust and the Adviser. The Adviser is entitled to receive an advisory fee based the Fund's average daily net assets for the services and facilities it provides payable at the annual rate of 0.15%.

The Adviser has contractually agreed to reduce its management fee from 0.15% to 0.00% of the Fund's average daily net assets. The Fee Waiver Agreement does not provide for recoupment of waived management fees and it will remain in place until October 31, 2026 unless terminated sooner by the Trustees.

The Adviser (or an affiliate of the Adviser) bears all of the Adviser's own costs associated with providing these advisory services and all expenses of the Fund, except for the fee payment under the Advisory Agreements, payments under the Fund's Rule 12b-1 Distribution and Service Plan (the "Plan"), brokerage expenses, acquired fund fees and expenses, taxes, interest (including borrowing costs), litigation expense and other non-routine or extraordinary expenses. Additionally, the Fund shall be responsible for its non-operating expenses and fees and expenses associated with the Fund's securities lending program, if applicable.

The Advisory Agreement for the Fund provides that it may be terminated at any time, without the payment of any penalty, by the Board or, with respect to the Fund, by a majority of the outstanding shares of the Fund, on 60 days' written notice to the Adviser, and by the Adviser upon 60 days' written notice, and that it shall be automatically terminated if it is assigned.

Investment Sub-Adviser

The Adviser has retained Research Affiliates, LLC, an investment adviser registered with the SEC, to provide sub-advisory services for the Fund. The Sub-Adviser is organized as a California limited liability company with its principal office located at 660 Newport Center Drive, Suite 300, Newport Beach, California 92660, and was founded in 2002. The Sub-Adviser has discretionary responsibility to select the Fund's investments in accordance with the Fund's investment objectives, policies and restrictions. The Sub-Adviser is affiliated with the Index Provider.

The Sub-Adviser is not responsible for selecting broker-dealers or placing the Fund's trades. Rather, the Sub-Adviser constructs the overall portfolio and provides trading instructions to the Adviser, and, in turn, the Adviser is responsible for selecting broker-dealers and placing the Fund's trades.

For its services, the Adviser pays the Sub-Adviser a fee, which is calculated daily and paid monthly, at an annual rate based on the Fund's average daily net assets as follows: 0.08% (annual rate as a percentage of average daily net assets).

Fund Sponsor

The Adviser has entered into a fund sponsorship agreement with the Index Provider pursuant to which it is also the sponsor of the Fund ("Fund Sponsor"). Under this arrangement, the Fund Sponsor has agreed to provide financial support to the Fund (as described below) and, in turn, the Adviser has agreed to share with the Fund Sponsor a portion of profits, if any, generated by the Fund's Advisory Fee (also as described below). Every month, the Advisory Fee, which is a unitary management fee, is calculated and paid to the Adviser.

If the amount of the unitary management fee exceeds the Fund's operating expenses and the Adviser-retained amount, the Adviser pays the net total to the Fund Sponsor. The amount paid to the Fund Sponsor represents both the index licensing fee and any remaining profits from the Advisory Fee. During months where there are no profits or the funds are not sufficient to cover the entire index licensing fee, the index licensing fee is automatically waived.

If the amount of the unitary management fee is less than the Fund's operating expenses and the Adviser-retained amount, Fund Sponsor is obligated to reimburse the Adviser for the shortfall.

The Adviser-retained amount represents an agreed upon fee arrangement between the Adviser and Fund Sponsor. This arrangement calls for the Fund Sponsor to pay the Adviser a fee and reimburse the Adviser for certain Fund operating expenses it paid pursuant to the Advisory Agreement.

APPROVAL OF ADVISORY AGREEMENT & INVESTMENT SUB-ADVISORY AGREEMENT

A discussion regarding the basis for the Board's approval of the Advisory Agreement and sub-advisory agreement with respect to the Fund will be available in the Fund's first Form N-CSR dated December 31, 2025.

Manager of Managers Structure

The Adviser and the Trust have received an exemptive order (the "Order") from the SEC that allows each Fund to operate in a "manager of managers" structure whereby the Adviser can appoint and replace unaffiliated sub-advisers, and enter into, amend and terminate sub-advisory agreements with such sub-advisers, each subject to Board approval, but without obtaining prior shareholder approval ("Manager of Managers Structure"). Each Fund will, however, inform shareholders of the hiring of any new sub-adviser within 90 days after the hiring, to the extent the Fund is relying on the Order. The Order provides each Fund with greater flexibility and efficiency by preventing the Fund from incurring the expense and delays associated with obtaining shareholder approval of such sub-advisory agreements.

To the extent the Fund relies on the Order, the Fund's use of the Manager of Managers Structure is subject to certain conditions that are set forth in the Order. Under the Manager of Managers Structure, the Adviser has the ultimate responsibility, subject to oversight by the Board, to oversee sub-advisers and recommend their hiring, termination and replacement. The Adviser will also, subject to the review and approval of the Board; set each Fund's overall investment strategy; evaluate, select and recommend sub-advisers to manage all or a portion of each Fund's assets; and implement procedures reasonably designed to ensure that each sub-adviser complies with each Fund's investment goal, policies and restrictions. Subject to review by the Board, the Adviser will allocate and, when appropriate, reallocate each Fund's assets among sub-advisers and monitor and evaluate the sub-advisers' performance.

PORTFOLIO MANAGERS

Messrs. Wm. Joshua Russell and Richard Shaner are the portfolio managers who are primarily and jointly responsible for the day-to-day management of the Fund.

Wm. Joshua Russell, PhD, CFA has been a Senior Portfolio Manager with the Adviser since October 2022 and a portfolio manager of the Fund since July 2024. Prior to this, he was a Portfolio Manager at Carson Group where he was responsible for approximately \$1.7 billion in assets. He has also served in quant research roles as VP, Sr. Research Analyst at Franklin Templeton and Senior Quantitative Strategist at WisdomTree. Prior to entering the industry, Dr. Russell was a PhD candidate where he conducted research on large-scale distributed systems for the U.S. Army, the U.S. Air Force, and NASA. He earned a PhD in Electrical and Computer Engineering, a Masters in Economics, and a Masters in Electrical and Computer Engineering at the University of California, Santa Barbara. Dr. Russell earned a Bachelor of Science in Electrical Engineering from the University of Washington and is a CFA® Charterholder.

Richard Shaner has been portfolio manager of the Fund since July 2024. Mr. Shaner has advised on trading and execution matters for the Adviser since January 2021, where he supports trading operations and assists in quantitative research. Prior to Mr. Shaner's tenure with the Adviser, Mr. Shaner executed various trading strategies for a private family office. Mr. Shaner has a B.Sc in Kinesiology and Applied Physiology from the University of Colorado. He is also a CFA® Charterholder.

The Fund's Statement of Additional Information ("SAI") provides additional information about the portfolio managers, including other accounts each manages, their ownership in the Fund, and compensation.

OTHER SERVICE PROVIDERS

Quasar Distributors, LLC ("Distributor") serves as the distributor of Creation Units (defined above) for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, is the administrator, fund accountant, and transfer agent for the Fund.

U.S. Bank National Association is the custodian for the Fund.

Practus, LLP, 11300 Tomahawk Creek Parkway, Suite 310, Leawood, Kansas 66211, serves as legal counsel to the Trust.

Tait, Weller & Baker LLP, 50 South 16th Street, Suite 2900, Philadelphia, Pennsylvania 19102, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

THE EXCHANGE

Shares are not sponsored, endorsed or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in, the determination of the timing of, prices of, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing or trading of Shares. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

ADDITIONAL NOTICES

The Adviser, the Fund, the Sub-Adviser and Index Provider make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly. The Index Provider has no obligation to take the needs of the Fund or the owners of Shares into consideration in determining, composing, or calculating the Index. The Index Provider is not responsible for, and has not participated in, the determination of the timing of, prices of, or quantities of Shares to be issued or in the determination or calculation of the equation by which Shares are redeemable. The Fund, the Adviser and the Sub-Adviser do not guarantee the accuracy, completeness, or performance of the Index or the data included therein and shall have no liability in connection with the Index or Index calculations. The Index Provider has retained an unaffiliated third party, Solactive, to calculate the Index. The Calculation Agent, using the applicable rules-based methodology, will calculate, maintain and disseminate the Index on a daily basis.

The Index Provider will monitor the results produced by the Calculation Agent to help ensure that the Index is being calculated in accordance with the applicable rules-based methodology.

BUYING AND SELLING FUND SHARES

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. Creation Units are generally issued and redeemed only in-kind for securities although a portion may be in cash.

Shares will trade on the secondary market, however, which is where most retail investors will buy and sell Shares. It is expected that only a limited number of institutional investors, called Authorized Participants or "APs," will purchase and redeem Shares directly from the Fund. APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly

to the Fund, at NAV per Share only in large blocks, or Creation Units. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

Except when aggregated in Creation Units, Shares are not redeemable with the Fund.

BUYING AND SELLING SHARES ON THE SECONDARY MARKET

Most investors will buy and sell Shares in secondary market transactions through brokers and, therefore, must have a brokerage account to buy and sell Shares. Shares can be bought or sold through your broker throughout the trading day like shares of any publicly traded issuer. The Trust does not impose any redemption fees or restrictions on redemptions of Shares in the secondary market. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered prices in the secondary market for Shares. The price at which you buy or sell Shares (*i.e.*, the market price) may be more or less than the NAV of the Shares. Unless imposed by your broker, there is no minimum dollar amount you must invest in the Fund and no minimum number of Shares you must buy.

Shares of the Fund are listed on the Exchange under the following symbol:

| Fund | Trading Symbol |
|--------------|-----------------------|
| RACWI US ETF | RAUS |

The Exchange is generally open Monday through Friday and is closed for weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Washington's Birthday, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

For information about buying and selling Shares on the Exchange or in the secondary markets, please contact your broker or dealer.

Book Entry. Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC"), or its nominee, will be the registered owner of all outstanding Shares and is recognized as the owner of all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely on the procedures of DTC and its participants. These procedures are the same as those that apply to any stocks that you hold in book entry or "street name" through your brokerage account. Your account information will be maintained by your broker, which will provide you with account statements, confirmations of your purchases and sales of Shares, and tax information. Your broker also will be responsible for distributing income dividends and capital gain distributions and for ensuring that you receive shareholder reports and other communications from the Fund.

Share Trading Prices. The trading prices of Shares may differ from the Fund's daily NAV and can be affected by market forces of supply and demand for Shares, the prices of the Fund's portfolio securities, economic conditions and other factors.

The Exchange through the facilities of the Consolidated Tape Association or another market information provider intends to disseminate the approximate value of the Fund's portfolio every fifteen seconds during regular U.S. trading hours. This approximate value should not be viewed as a "real-time" update of the NAV of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day. The quotations for certain investments may not be updated during U.S. trading hours if such holdings do not trade in the U.S., except such quotations may be updated to reflect currency fluctuations. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate values and makes no warranty as to the accuracy of these values.

Continuous Offering. The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a "distribution," as such term is used in the Securities Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirements and liability provisions of the Securities Act. For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus

delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the Investment Company Act of 1940, as amended (the “Investment Company Act”). As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

ACTIVE INVESTORS AND MARKET TIMING

The Board has evaluated the risks of market timing activities by the Fund’s shareholders. The Board noted that Shares can be purchased and redeemed directly from the Fund only in Creation Units by APs and that the vast majority of trading in Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund’s trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), the Board noted that those trades do not cause the harmful effects (as previously noted) that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objective, although in certain circumstances (*e.g.*, in conjunction with a reallocation of the Fund’s investments), such trades may benefit Fund shareholders by increasing the tax efficiency of the Fund. The Board also noted that direct trading by APs is critical to ensuring that Shares trade at or close to NAV. In addition, the Fund will impose transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Fund in effecting trades. Given this structure, the Board determined that it is not necessary to adopt policies and procedures to detect and deter market timing of Shares.

DISTRIBUTION AND SERVICE PLAN

The Fund has adopted the Plan pursuant to Rule 12b-1 under the Investment Company Act. Under the Plan, the Fund may be authorized to pay distribution fees of up to 0.25% of its average daily net assets each year to the Distributor and other firms that provide distribution and shareholder services (“Service Providers”). As of the date of this Prospectus, the maximum amount payable under the Plan is set at 0% until further action by the Board. In the event 12b-1 fees are charged, over time they would increase the cost of an investment in the Fund because they would be paid on an ongoing basis.

NET ASSET VALUE

The NAV of Shares is calculated each business day as of the close of regular trading on the New York Stock Exchange (“NYSE”), generally 4:00 p.m., Eastern time.

The Fund calculates its NAV per Share by:

- Taking the current market value of its total assets,
- Subtracting any liabilities, and
- Dividing that amount by the total number of Shares owned by shareholders.

If you buy or sell Shares on the secondary market, you will pay or receive the market price, which may be higher or lower than NAV. Your transaction will be priced at NAV only if you purchase or redeem your Shares in Creation Units.

Equity securities that are traded on a national securities exchange, except those listed on the NASDAQ Global Market® (“NASDAQ”) are valued at the last reported sale price on the exchange on which the security is principally traded. Securities traded on NASDAQ will be valued at the NASDAQ Official Closing Price (“NOCP”). If, on a particular day, an exchange-traded or NASDAQ security does not trade, then the most recent quoted bid for exchange traded or the mean between the most recent quoted bid and ask price for NASDAQ securities will be used. Equity securities that are not traded on a listed exchange are generally valued at the last sale price in the over-the-counter market. If a nonexchange traded security does not trade on a particular day, then the mean between the last quoted closing bid and asked price will be used.

Redeemable securities issued by open-end investment companies are valued at the investment company’s applicable net asset value, with the exception of exchange-traded open-end investment companies which are priced as equity securities.

If a market price is not readily available or is deemed not to reflect market value, the Fund will determine the price of the security held by the Fund based on a determination of the security’s fair value pursuant to policies and procedures approved by the Board.

To the extent the Fund holds securities that may trade infrequently, fair valuation may be used more frequently. Fair valuation may have the effect of reducing stale pricing arbitrage opportunities presented by the pricing of Shares. However, when the Fund uses fair valuation to price securities, it may value those securities higher or lower than another fund would have priced the security. Also, the use of fair valuation may cause the Shares’ NAV performance to diverge from the Shares’ market price and

from the performance of various benchmarks used to compare the Fund's performance because benchmarks generally do not use fair valuation techniques. Because of the judgment involved in fair valuation decisions, there can be no assurance that the value ascribed to a particular security is accurate.

FUND WEBSITE AND DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust maintains a website for the Fund at <https://rafietfs.com/>. Among other things, the website includes this Prospectus and the SAI, and will include the Fund's annual and semi-annual reports to shareholders, financial information, holdings, and proxy information. The website shows the Fund's daily NAV per share, market price, and premium or discount, each as of the prior business day. The website also shows the extent and frequency of the Fund's premiums and discounts. Further, the website includes the Fund's median bid-ask spread over the most recent thirty calendar days.

Each day the Fund is open for business, the Trust publicly disseminates the Fund's full portfolio holdings as of the close of the previous day through its website at <https://rafietfs.com/>. A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI.

INVESTMENTS BY OTHER INVESTMENT COMPANIES

For purposes of the Investment Company Act, Shares are issued by a registered investment company and purchases of such Shares by registered investment companies and companies relying on Section 3(c)(1) or 3(c)(7) of the Investment Company Act are subject to the restrictions set forth in Section 12(d)(1) of the Investment Company Act, except as permitted by Rule 6c-11, Rule 12d1-4, or an exemptive order of the SEC.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Dividends and Distributions

Dividends and Distributions. The Fund intends to elect and intends to qualify each year as a regulated investment company under the Internal Revenue Code of 1986, as amended. As a regulated investment company, the Fund generally pays no U.S. federal income tax on the income and gains it distributes to you. The Fund expects to declare and to distribute its net investment income, if any, to shareholders as dividends annually. The Fund will distribute net realized capital gains, if any, at least annually. The Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate U.S. federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee the Fund will pay either an income dividend or a capital gains distribution. Distributions may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Avoid "Buying a Dividend." At the time you purchase Shares of the Fund, the Fund's NAV may reflect undistributed income, undistributed capital gains, or net unrealized appreciation in value of portfolio securities held by the Fund. For taxable investors, a subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. Buying Shares in the Fund just before it declares an income dividend or capital gains distribution is sometimes known as "buying a dividend."

Taxes

Tax Considerations. The Fund expects, based on its investment objective and strategies, that its distributions, if any, will be taxable as ordinary income, capital gains, or some combination of both. This is true whether you reinvest your distributions in additional Shares or receive them in cash. For U.S. federal income tax purposes, Fund distributions of short-term capital gains are taxable to you as ordinary income. Fund distributions of long-term capital gains are taxable to you as long-term capital gain no matter how long you have owned your Shares. A portion of income dividends reported by the Fund may be qualified dividend income eligible for taxation by certain shareholders at long-term capital gain rates provided certain holding period requirements are met.

Taxes on Sales of Shares. A sale or exchange of Shares is a taxable event and, accordingly, a capital gain or loss will generally be recognized. Currently, any capital gain or loss realized upon a sale of Shares generally is treated as long-term capital gain or loss if

the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses may be limited.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Shares) of U.S. individuals, estates, and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds a threshold amount. This Medicare tax, if applicable, is reported by you on, and paid with, your U.S. federal income tax return.

Backup Withholding. By law, if you do not provide the Fund with your proper taxpayer identification number and certain required certifications, you may be subject to backup withholding on any distributions of income, capital gains or proceeds from the sale of your Shares. The Fund also must backup withhold if the Internal Revenue Service ("IRS") instructs it to do so. When backup withholding is required, the amount will be 24% of any distributions or proceeds paid.

State and Local Taxes. Fund distributions and gains from the sale or exchange of your Shares generally are subject to applicable state and local taxes.

Taxes on Purchase and Redemption of Creation Units. An AP who exchanges equity securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of purchase and the exchanger's aggregate basis in the securities surrendered and the cash amount paid. A person who exchanges Creation Units for equity securities generally will recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the aggregate market value of the securities received and the cash amount received. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether the wash sale rules apply and when a loss might not be deductible.

Under current U.S. federal tax laws, any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

If the Fund redeems Creation Units in cash, it may recognize more capital gains than it will if it redeems Creation Units in-kind.

Non-U.S. Investors. Non-U.S. investors may be subject to U.S. federal withholding tax at a 30% or lower treaty rate and are subject to special U.S. federal tax certification requirements to avoid backup withholding and claim any treaty benefits. An exemption from U.S. federal withholding tax is provided for capital gain dividends paid by the Fund from long-term capital gains, if any. However, interest-related dividends paid by the Fund from its qualified net interest income from U.S. sources and short-term capital gain dividends may be exempt from U.S. withholding provided the Fund makes certain designations and other requirements are met. Furthermore, notwithstanding such exemptions from U.S. federal withholding at the source, any such dividends and distributions of income and capital gains will be subject to U.S. federal backup withholding at a rate of 24% if you fail to properly certify that you are not a U.S. person. In addition, U.S. estate tax may apply to Shares of the Fund.

Other Reporting and Withholding Requirements. Under the Foreign Account Tax Compliance Act (FATCA), the Fund will be required to withhold a 30% tax on (i) income dividends paid by the Fund, and (ii) possibly in the future, certain capital gain distributions and the proceeds arising from the sale of Shares paid by the Fund, to certain foreign entities, referred to as foreign financial institutions or non-financial foreign entities, that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. The Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Possible Tax Law Changes. At the time that this prospectus is being prepared, various administrative and legislative changes to the U.S. federal tax laws are under consideration, but it is not possible at this time to determine whether any of these changes will be made or what the changes might entail.

This discussion of "Dividends, Distributions and Taxes" is not intended or written to be used as tax advice. Because everyone's tax situation is unique, you should consult your tax professional about U.S. federal, state, local or foreign tax consequences before making an investment in the Fund.

FINANCIAL HIGHLIGHTS

The Fund is newly organized and therefore has not yet had any operations as of the date of this Prospectus and does not have financial highlights to present at this time.

If you would like more information about the Fund and the Trust, the following documents are available free, upon request:

ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS

Additional information about the Fund will be in its annual and semi-annual reports to shareholders and in Form N-CSR. The annual report explains the market conditions and investment strategies affecting the Fund's performance during the last fiscal year. In Form N-CSR, you will find the Fund's annual and semi-annual financial statements.

STATEMENT OF ADDITIONAL INFORMATION

The SAI dated June 18, 2025, which contains more details about the Fund, is incorporated by reference in its entirety into this Prospectus, which means that it is legally part of this Prospectus.

Recent information regarding each Fund covered by this Prospectus, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund's website listed below. To receive a free copy of the latest annual or semi-annual report, or the SAI, or to request additional information about the Fund, please contact us as follows:
